

Outdoor Park & Recreational Fixtures
Shelters • Gazebos • Furnishings • Bridges • Railings

Since 1987, Custom Park & Leisure Ltd. (CPL) has worked hard to ensure that every product we offer is delivered with the highest level of workmanship and quality control.

From design through to completion, our knowledgeable and professional staff is available to work with you every step of the way. From park benches to large-scale fabrication projects, CPL offers a range of expertise that is unparalleled.

Since we own and operate our metal fabrication facility, we can maintain quality control right through to installation. Our extensive catalogue of engineered structures gives you the freedom to choose the style that's right for your project. If you can't find what you're looking for, just talk to us and let our craftsmen help you realize and design the perfect piece for your project.

CPL is Canadian Welding Bureau (CWB) Certified and because we can design and build to even the most rigid specifications, we have developed long-term relationships with several city centres, municipalities, major land developers, and commercial landscapers.

Our many years of manufacturing and construction experience, combined with the finest wood, metal and stone building materials, offers you the peace of mind that comes with choosing the very best.

Steel Gazebos & Shelters

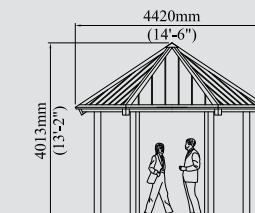

Maranda Series

Gazebos • Shelters

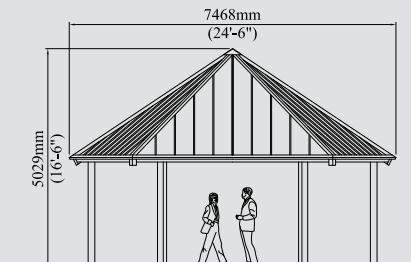

The Maranda Series Gazebo has an elegant, hip roof style with a variety of material options to complement your space.

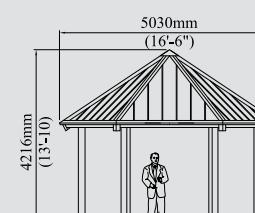

The fully engineered Maranda Series Gazebo is constructed with high-quality steel and will stand up to even the most extreme conditions. Gazebo roof material options include pre-finished metal panels, cedar shakes or asphalt shingles. Take advantage of a variety of valance and railing options to suit your site design preferences.

Steel Gazebos & Shelters

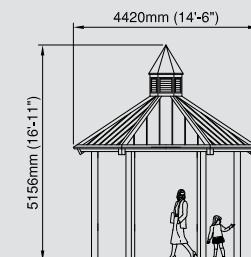

Coventry Series

Gazebos • Shelters

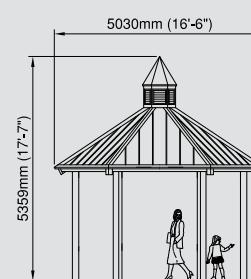

The traditional, hexagonal Coventry Series Gazebo offers a variety of decorative features to fit the character of your surrounding site.

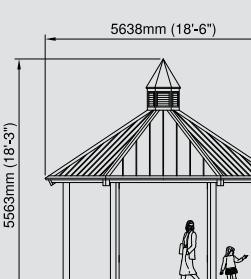

Constructed with high-quality steel, this fully engineered Coventry Series Gazebo comes standard with a cupola and decorative valance. Gazebo roof material options include pre-finished metal panels, cedar shales or asphalt shingles. There are also a number of railing options that can be added to enhance the gazebo.

Steel Gazebos & Shelters

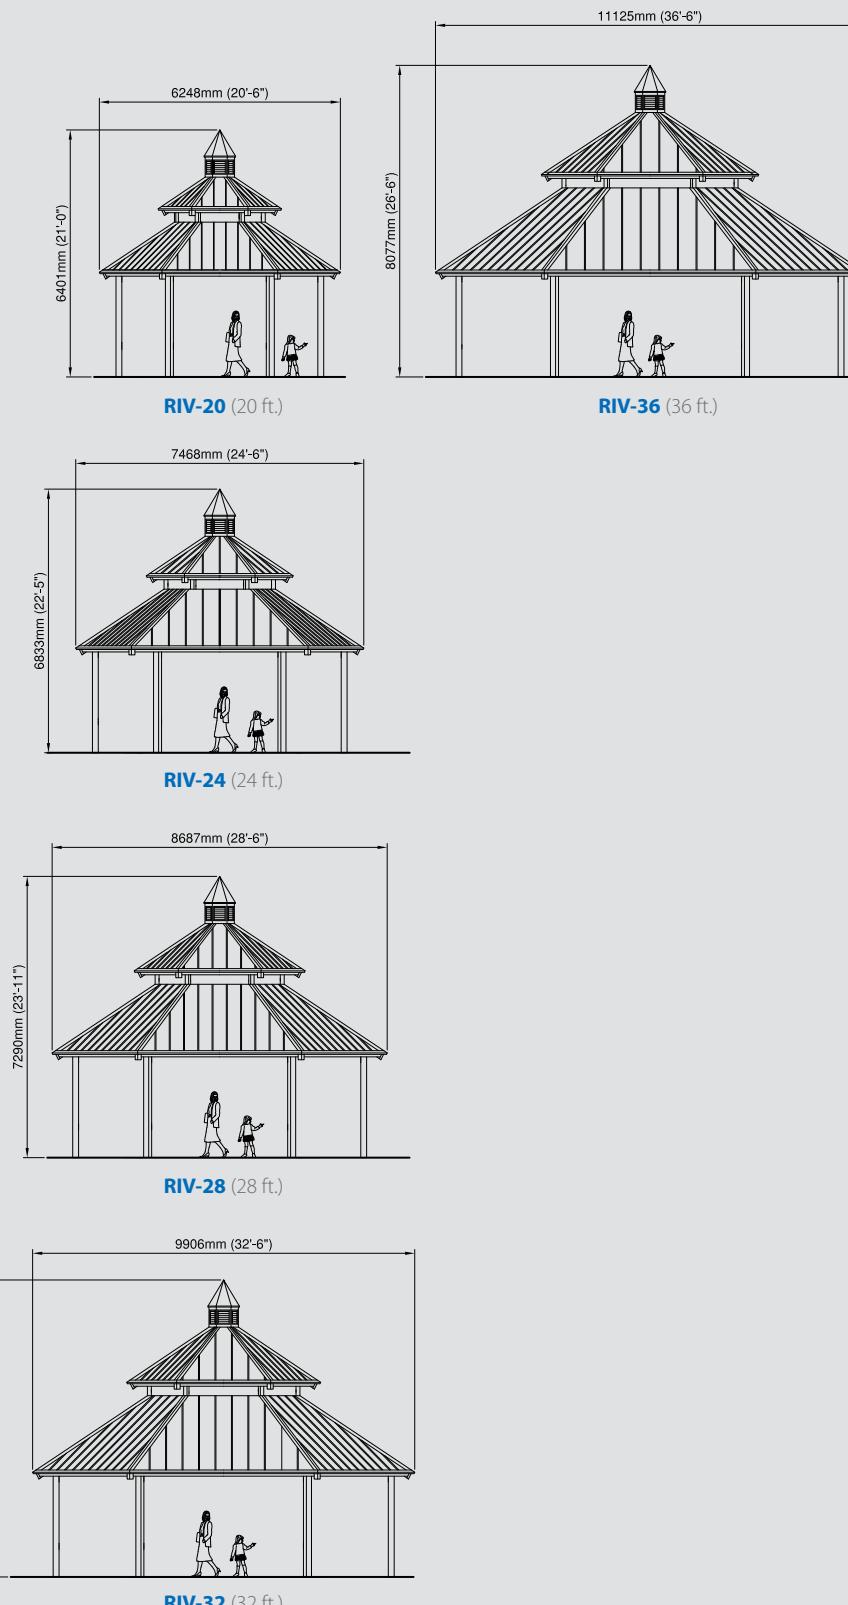

Rivercrest Series

Gazebos • Shelters

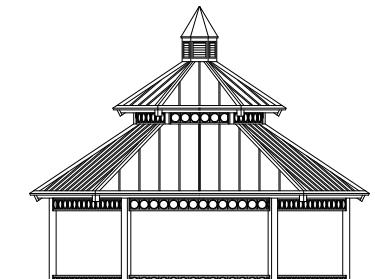

The classic Rivercrest Series Gazebo offers a classic style with an attractive, two-tiered roof structure.

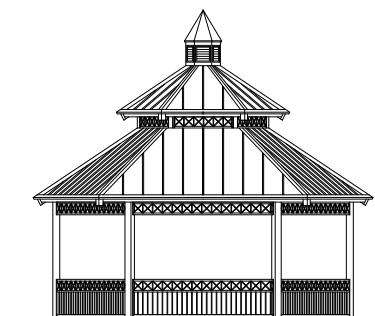

The architecturally designed Rivercrest Series Gazebo is fully engineered and manufactured with high-quality steel. The two-tiered roof design will complement any site. Gazebo roof material options include pre-finished metal panels, cedar shales or asphalt shingles. With options to adjust the roof pitch and a variety of valance and railing options, this gazebo can be customized to fit your design needs.

Our fully engineered Picnic Shelters feature a gable style roof with exposed beams and purlins.

Great for large gatherings, our classic picnic shelters are available in a steel design or with laminated wood beams. Roof material options include pre-finished metal panels, cedar shakes or asphalt shingles.

Steel Gazebos & Shelters

Custom Structures

Custom Structures

Custom Structures for Unique Applications.

In addition to our wide selection of engineered gazebos and shelters, CPL welcomes the challenge of custom designed projects. We offer design assistance and will manufacture the product to suit your specific architectural needs.

With products as varied as shade structures to entry and architectural features, examples of our work can be seen throughout Calgary and the surrounding area.

Pedestrian Bridges

Structural Steel

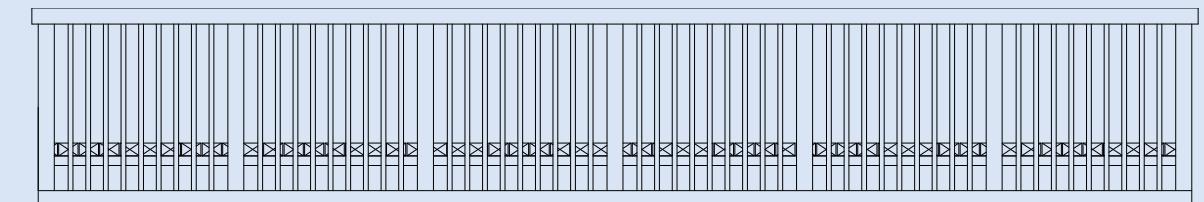

Bridges

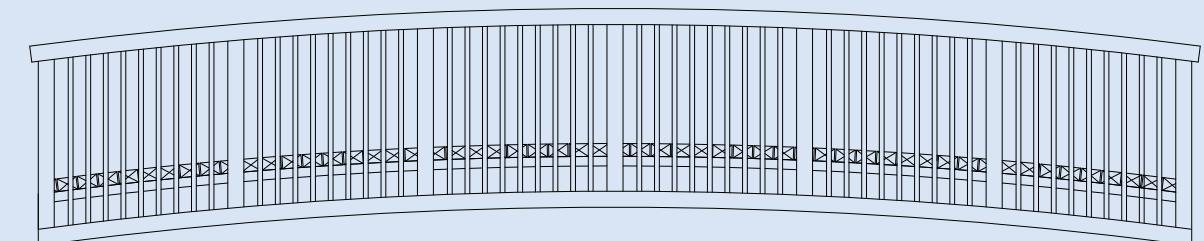

Our Structural Steel Beam and Steel Truss Pedestrian Bridges add elegance to any space.

Steel beam construction and ornamental iron rails result in an elegant, long-lasting bridge design that will maintain its integrity under all conditions. The bridge is fully engineered to span large distances and includes the option to add masonry for enhanced visual appeal.

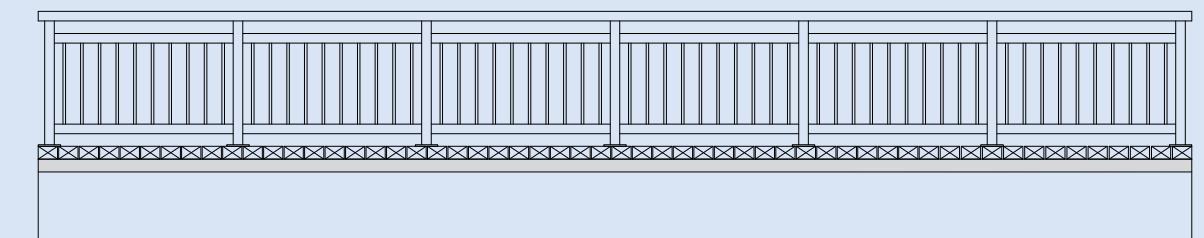

In addition to our standard structural bridges, we welcome the opportunity to help design and build custom decorative bridges for a variety of architectural applications.

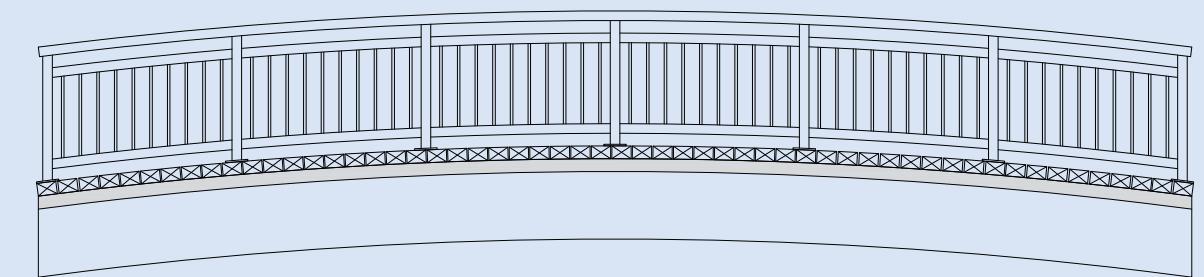

STEEL TRUSS - LEVEL (STBL-20, STBL-30, STBL-40, STBL-50, STBL-60)

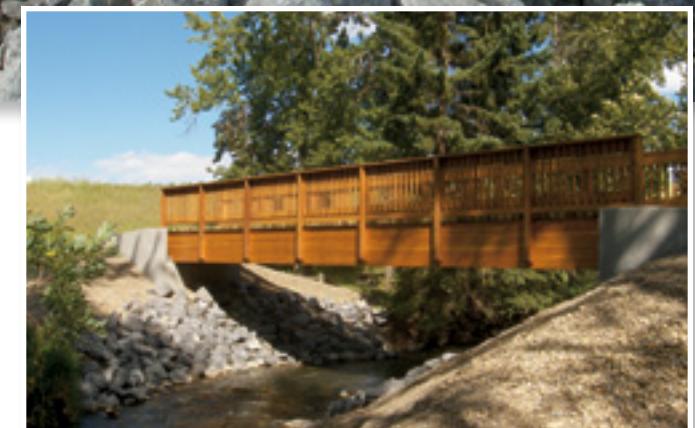

STEEL TRUSS - ARCHED (STBA-20, STBA-30, STBA-40, STBA-50, STBA-60)

STEEL BEAM - LEVEL (SBBL-20, SBBL-30, SBBL-40, SBBL-50, SBBL-60)

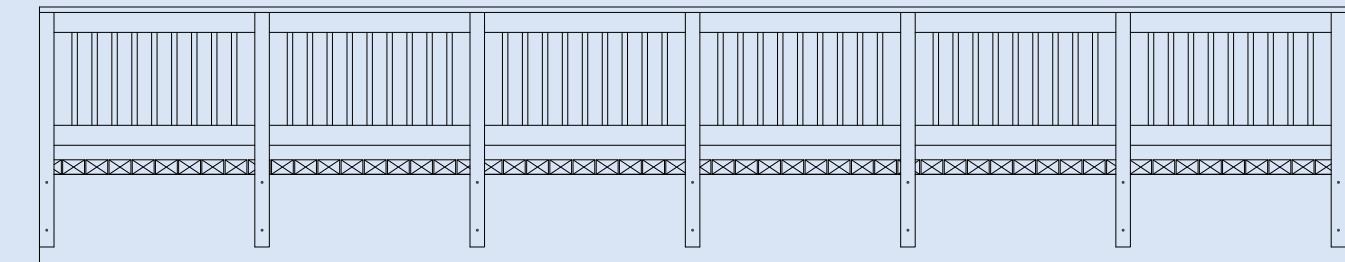

STEEL BEAM - ARCHED (SBBA-20, SBBA-30, SBBA-40, SBBA-50, SBBA-60)

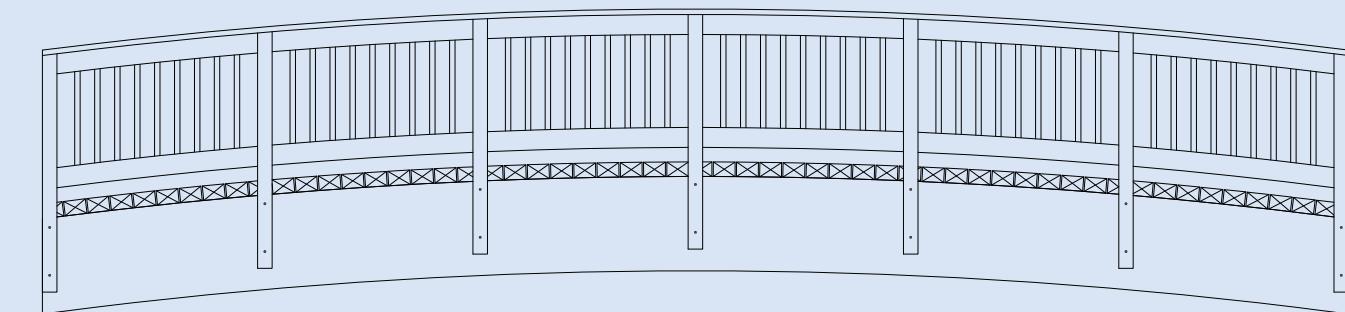

Our Glulam Beam Pedestrian Bridges bring warmth and character to the environment.

Our Glulam Beam Pedestrian Bridges are designed with wooden rails and are built to maintain their integrity under all conditions. The bridge is fully engineered to span large distances. The bridge's wood construction adds a feeling of warmth to your landscape.

In addition to our standard glulam bridges, we welcome the opportunity to help design and build custom decorative bridges for a variety of architectural applications.

GLULAM BEAM - LEVEL (GBBL-20, GBBL-30, GBBL-40, GBBL-50, GBBL-60)

Pedestrian Bridges

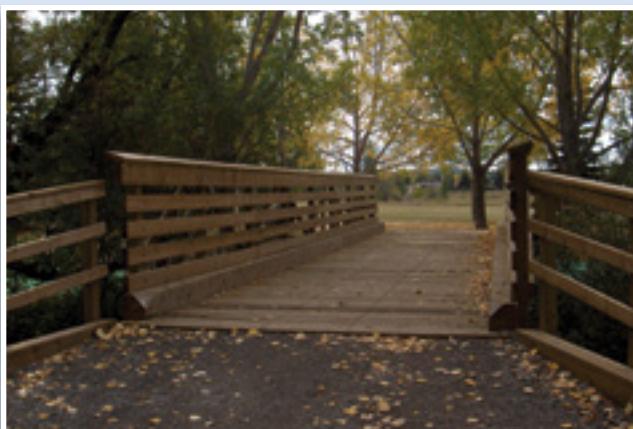

Custom Bridges

Custom Bridges

Custom Decorative Pedestrian Bridges.

We look forward to working with you to design and build custom decorative bridges for a variety of architectural applications, such as parks and other public areas. Built with the highest quality materials, our custom bridges will enhance any environment.

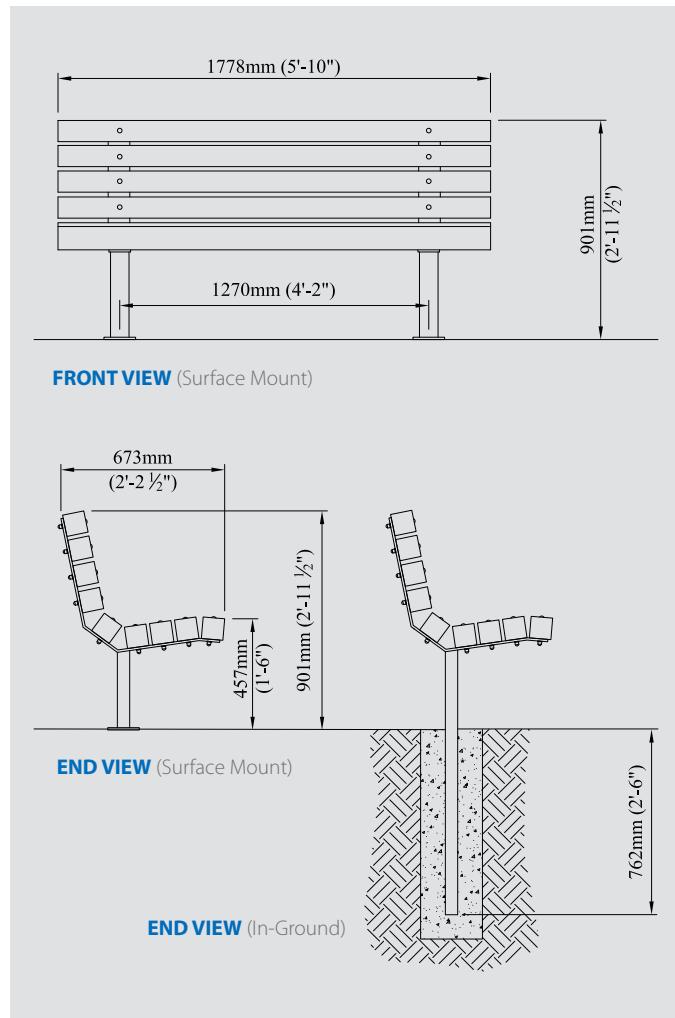

Site Furnishings

Park Benches - Series A

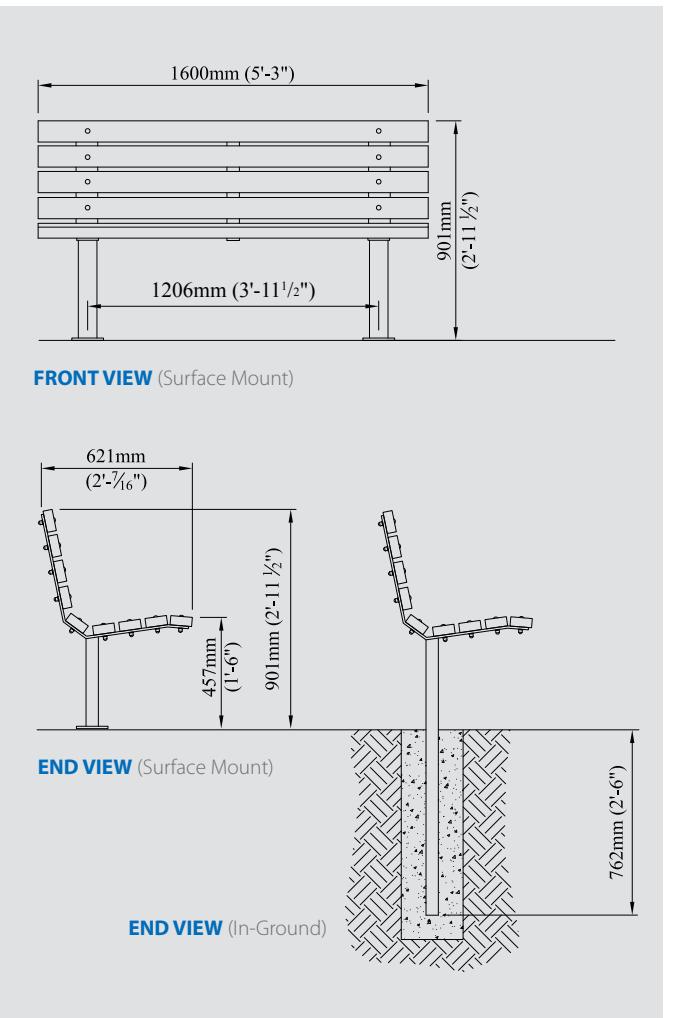

Series A Park Benches are ideal observation benches for natural settings.

These attractive and durable benches are suitable for any application and may be mounted on the surface or in-ground. The Series A Bench features hand-selected clear cedar and is available in two finishes: Sikkens stain or Lifetime preservative.

The Series AR Park Bench is made from recycled materials with a rigid steel frame construction.

The Series AR Bench features the same design as the Series A Bench and is available for surface mounting or in-ground installation. Since the Series AR Bench is made from recycled materials which are maintenance-free, the bench will not rot or splinter and is protected from insect damage. The recycled material is available in 4 colours.

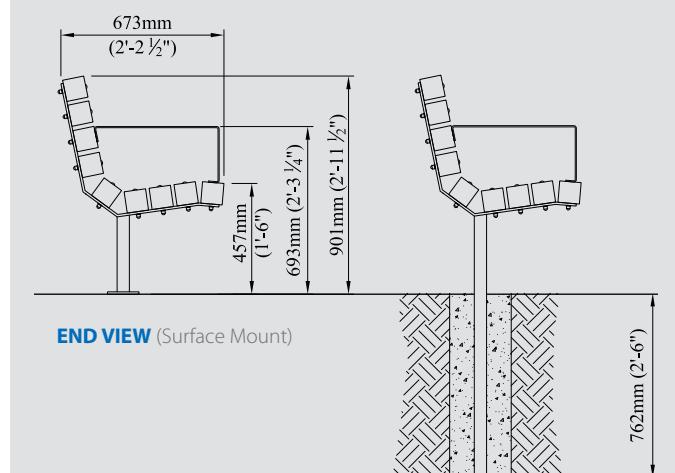

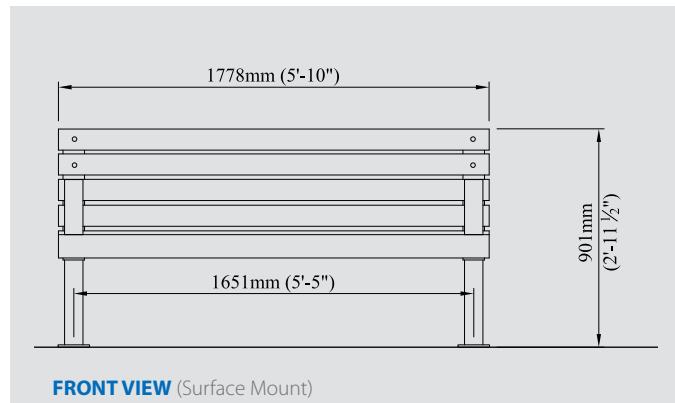

Site Furnishings

Park Benches - Series B

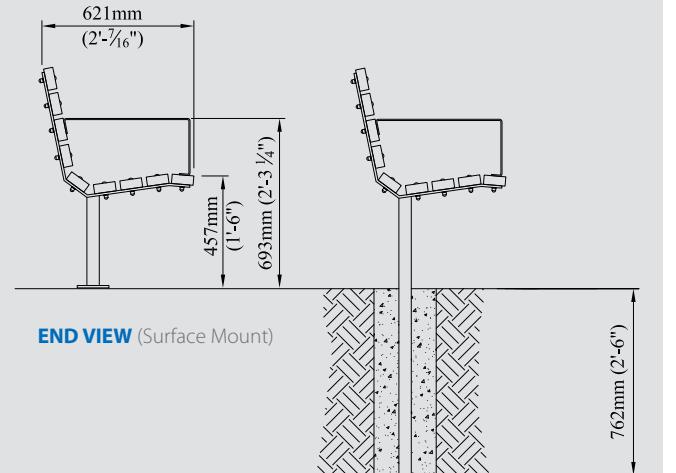

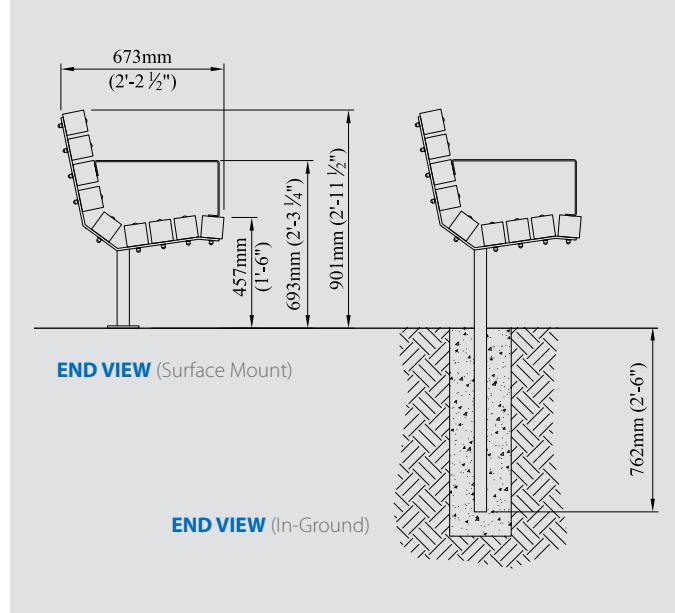

The Series B Park Bench features arm rests for added comfort.

This design features added arm rests which provide comfort and also discourage skateboard activity. This durable bench design is suitable for any application and may be surface mounted or installed in-ground. The Series B Bench is made of hand-selected clear cedar and is available in two finishes: Sikkens stain or Lifetime preservative.

The Series BR Park Bench is made from recycled materials with a rigid steel frame construction.

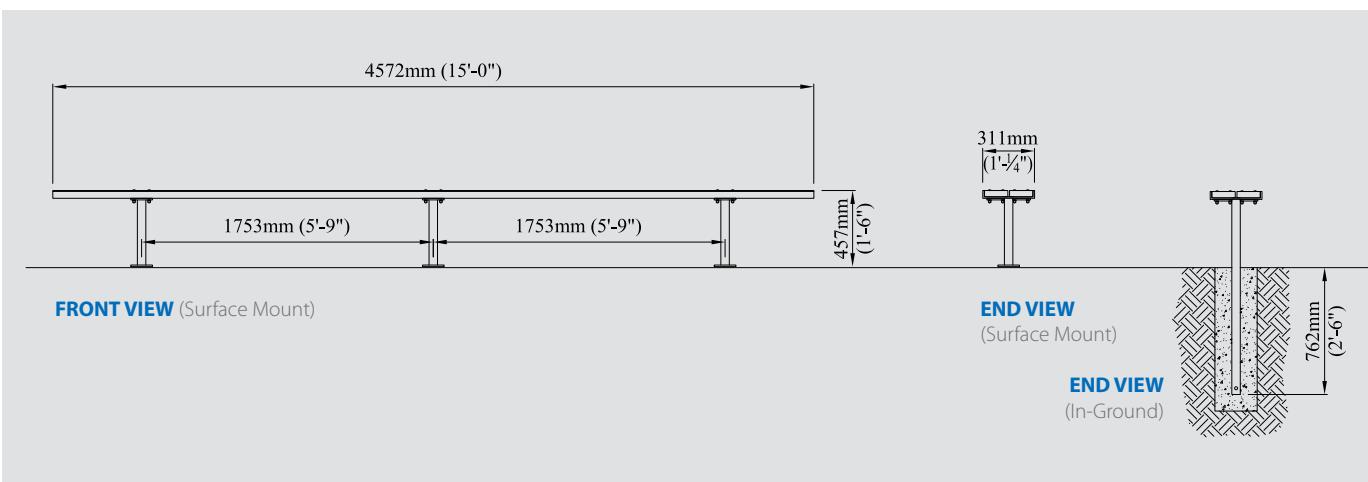

Since the Series BR Bench is made from recycled materials, it is maintenance-free, will not rot or splinter and is protected from insect damage. Like the Series B Bench, the Series BR Bench features arm rests which add comfort and reduce skateboard activity. Available in surface mount or in-ground installation, this bench design is appropriate for any application. The recycled material is available in 4 colours.

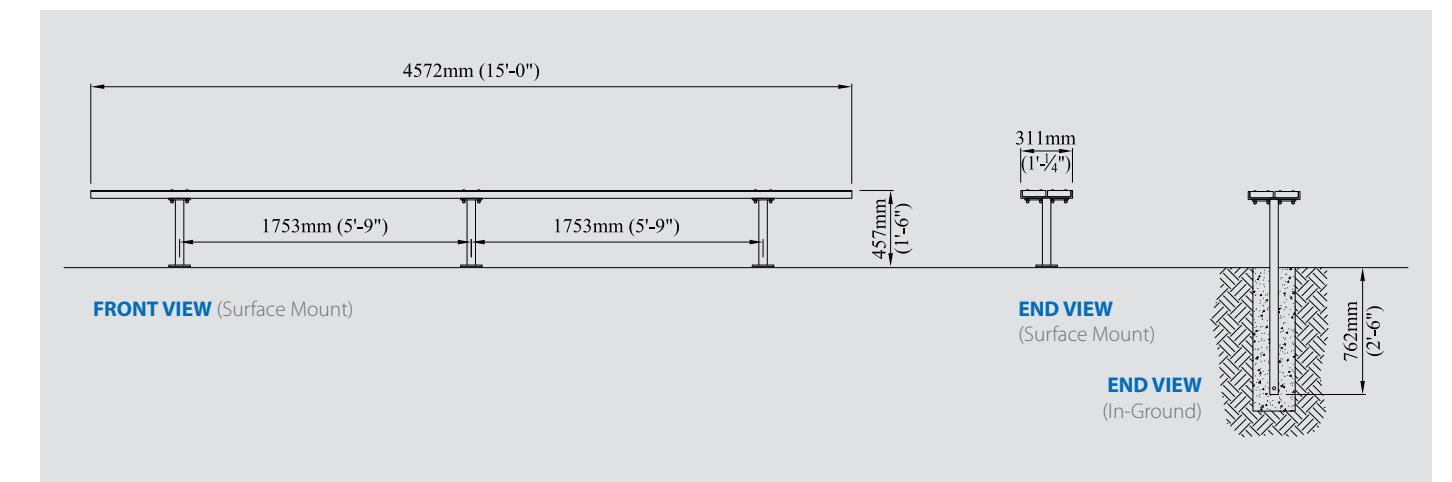

The Series C Park Bench is ideal for sports field applications.

The Series C Bench is perfect for large group gatherings and boasts a durable steel frame, which is powder coated. This simple bench design is ideal for sport field application. Benches are available in treated pine or select grade knotty cedar – with either a Sikkens stain or Lifetime preservative finish. All wood is sanded and routed to a smooth finish and the bench is available in surface mount or in-ground installation.

The Series CR Park Bench is made with a rigid steel frame construction.

This design is available as a surface mount or in-ground installation and the ideal design for sport field application. Since the Series CR Bench is made from recycled materials, it is maintenance-free and perfect for use as a players' bench. This design has a steel frame with a Trex surface that is able to withstand vigorous sport field use. The recycled material is available in 4 colours.

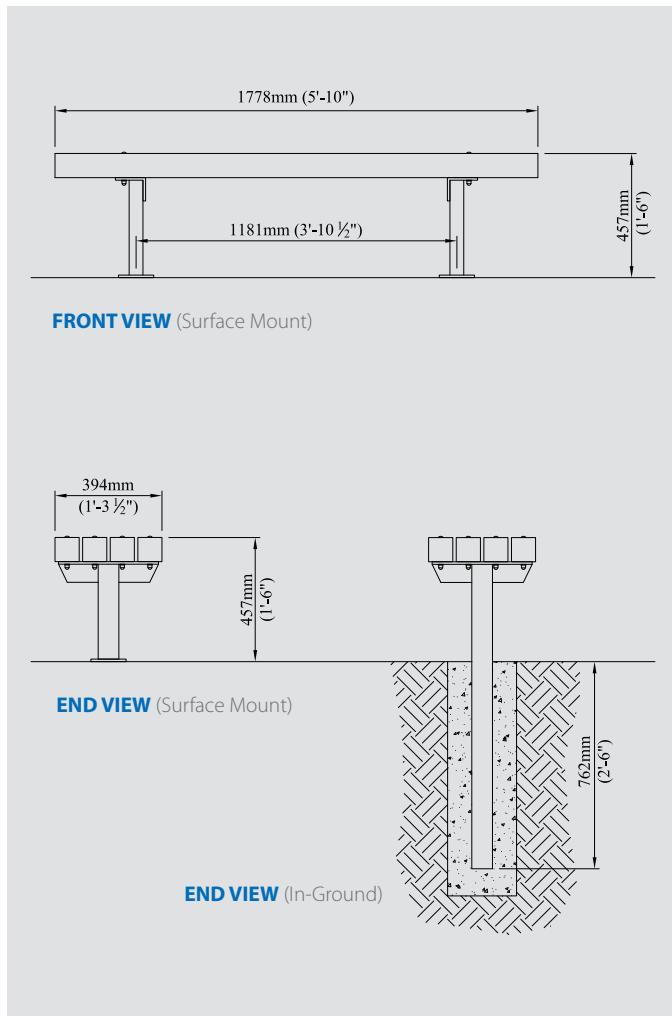

Site Furnishings

Park Benches - Series D

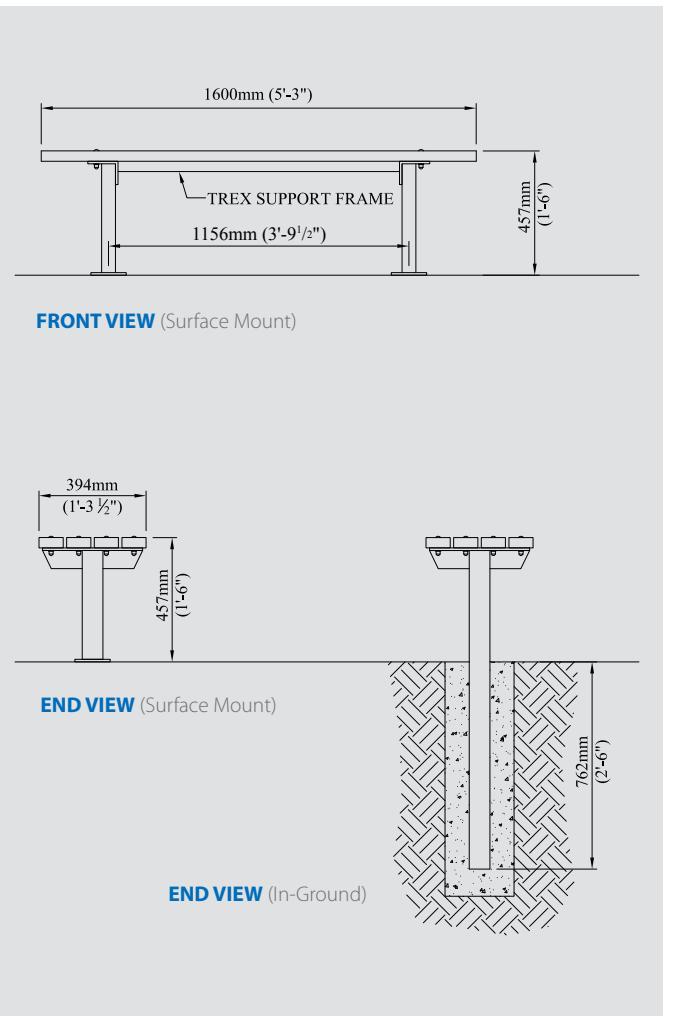

The Series D Park Bench enables multi-sided seating which is ideal for open spaces.

The Series D Bench is made of hand-selected clear cedar and is available in two finishes: Sikkens stain or Lifetime preservative. Since this flat bench design does not feature a backrest, you are not restricted to sitting on one side of the bench. This design is ideal for use in parks and other picturesque locations and is available as a surface mount or in-ground installation.

The Series DR Park Bench is made from recycled materials with a rigid steel frame construction.

This design is ideal for use in parks and other scenic areas and is available as a surface mount or in-ground installation. Since the Series DR Bench is made from recycled materials, it is maintenance-free, will not rot or splinter, and is protected from insect damage. Without a backrest, this flat bench enables people to sit on either side of the bench, making it an ideal choice for open spaces such as plazas. The recycled material is available in 4 colours.

Site Furnishings

Park Benches - Series E

Cedar with Lifetime Preservative

The Series E Park Benches features clean lines with a contemporary aesthetic.

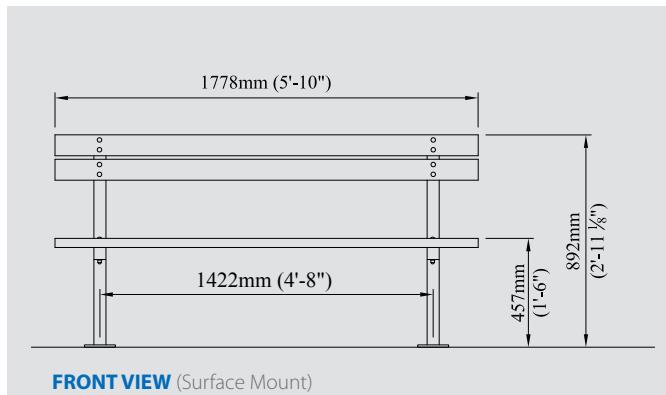

This economical design is suitable for any application and may be mounted on the surface or in-ground. Series E Benches are available in treated pine or select grade knotty cedar – with either a Sikkens stain or Lifetime preservative finish. All wood is sanded and routed to a smooth finish.

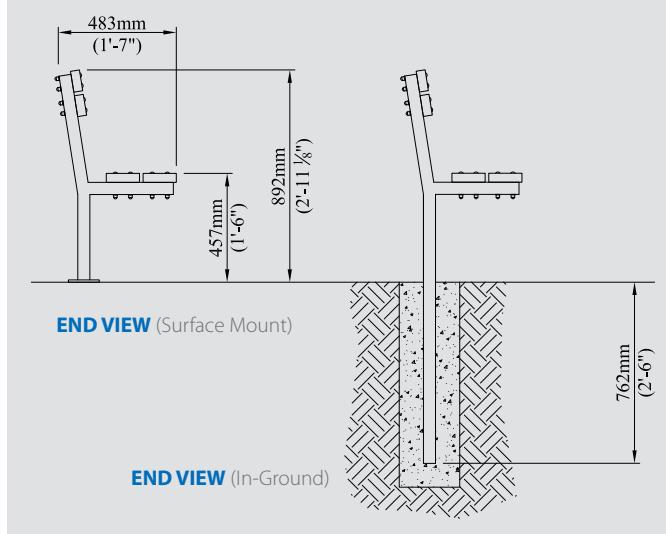

Cedar with Sikkens Stain

Pine with ACQ Preservative

Site Furnishings

Picnic Tables - Series A

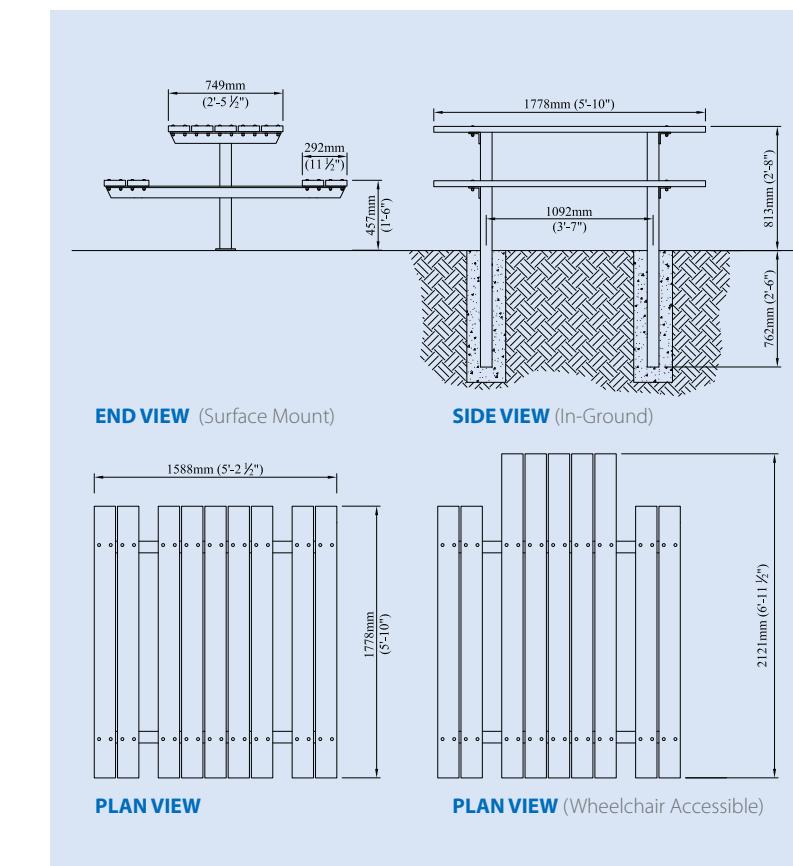

The Series A Picnic Table is a perfect complement to our benches and trash receptacles.

Available in a select grade knotty cedar which is available in two finishes: Sikkens stain or Lifetime preservative. Both the table-top and seat boards are made thicker for additional strength and durability.

The Series A1 Picnic Table features a two-post, steel construction.

The Series A1 Picnic Table is available in a select grade knotty cedar (finished with either Sikkens stain or Lifetime preservative) or ACQ treated pine. A durable choice for any park or public setting, the A1 model is the most economical choice in the A Series. The table may be surface or in-ground mounted.

Woodland Brown

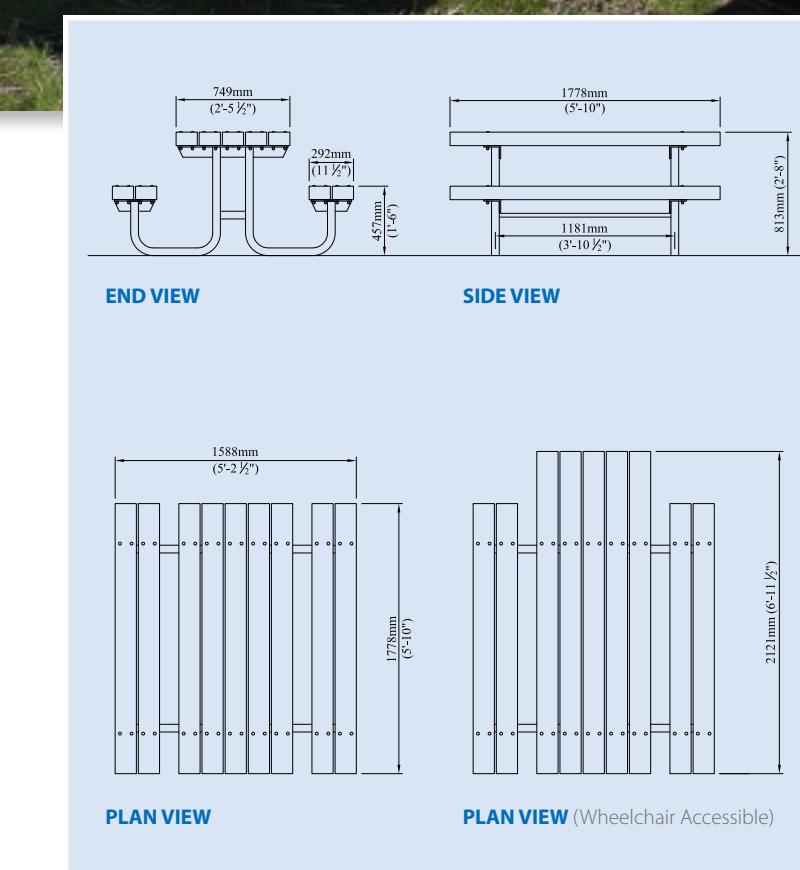

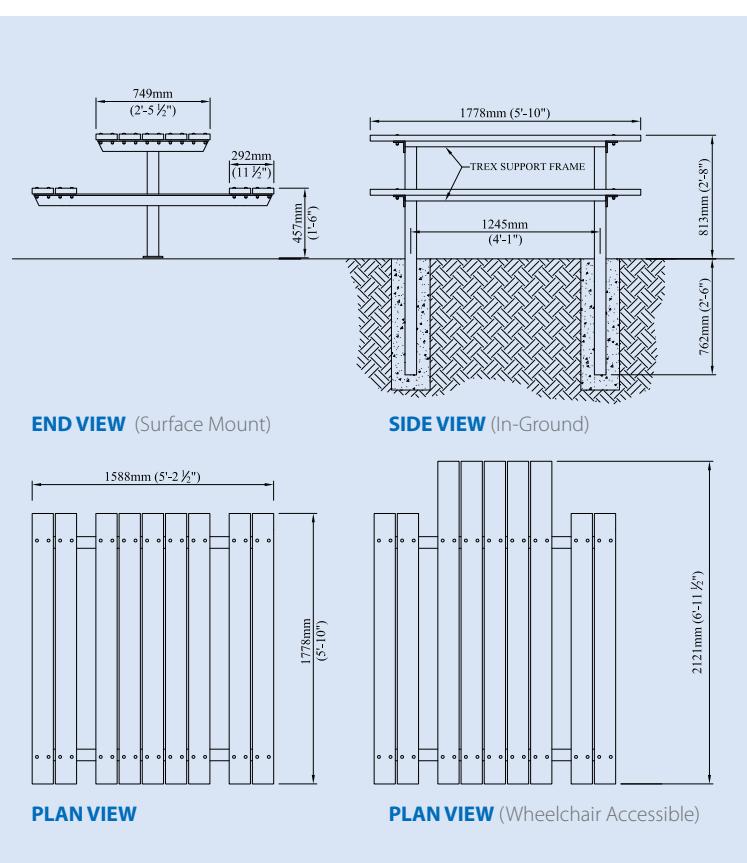

Winchester Grey

Saddle

The Series AR Picnic Table is made from long-lasting, recycled materials.

The Series AR Picnic Table is available in recycled materials, Trex, with additional steel framing incorporated to support the recycled material. The Series AR table is extremely durable, maintenance-free and able to withstand the toughest environments. This table may be surface or in-ground mounted.

The Series B Picnic Table offers flexible installation.

Suitable for a variety of applications, these tables are available in a select grade knotty cedar. Both the table-top and seat boards are made thicker for additional strength and durability. They may be freestanding or bolted down to a concrete surface.

Site Furnishings

Picnic Tables - Series B1

Cedar with Lifetime Preservative

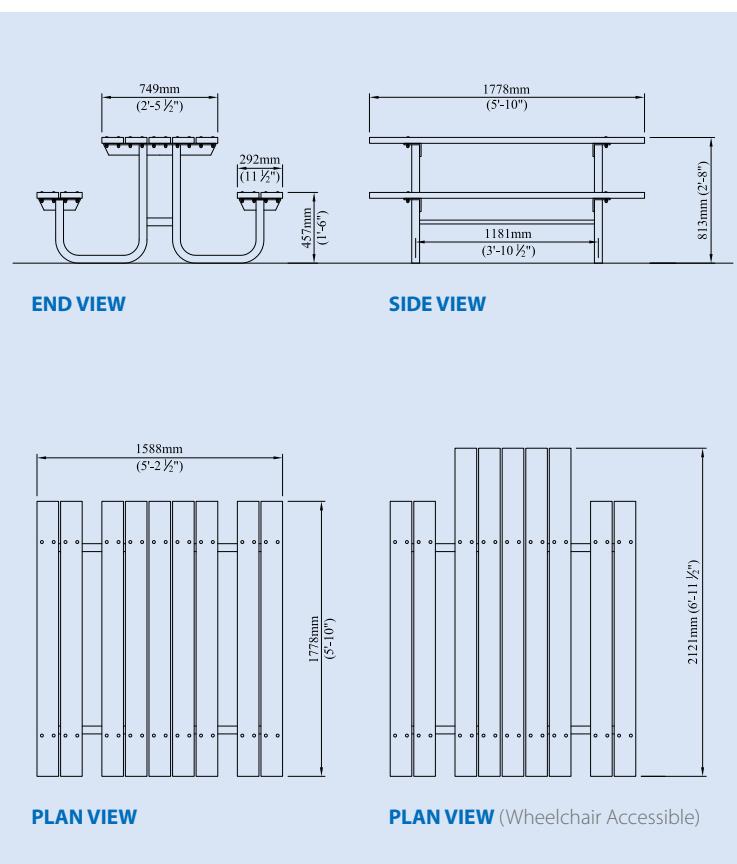

Cedar with Sikkens Stain

Pine with ACQ Preservative

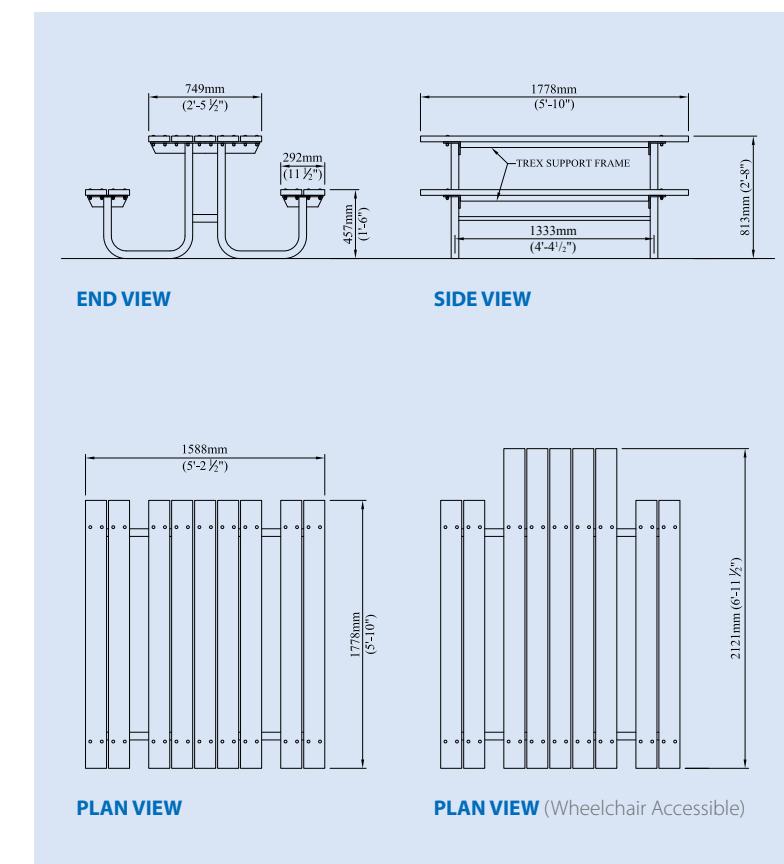

The Series B1 Picnic Table's versatility makes it a great choice for any setting.

With the flexibility to be freestanding or bolted down to a concrete surface, the Series B1 Picnic Table is a durable option for any park or public setting. It's the economical choice in the Series B product line and is available in a select grade knotty cedar (finished with either Sikkens stain or Lifetime preservative) or ACQ treated pine.

The Series BR Picnic Table is made from long-lasting, recycled materials.

Featuring the same design as the Series B1 model, the Series BR Picnic Table is extremely durable and available in recycled materials. The table is maintenance-free and is able to withstand the toughest environments. It may be placed freestanding or bolted down to a concrete surface.

Site Furnishings

Picnic Tables - Series C

The Series C Picnic Tables have a square configuration for comfortable seating and accessibility.

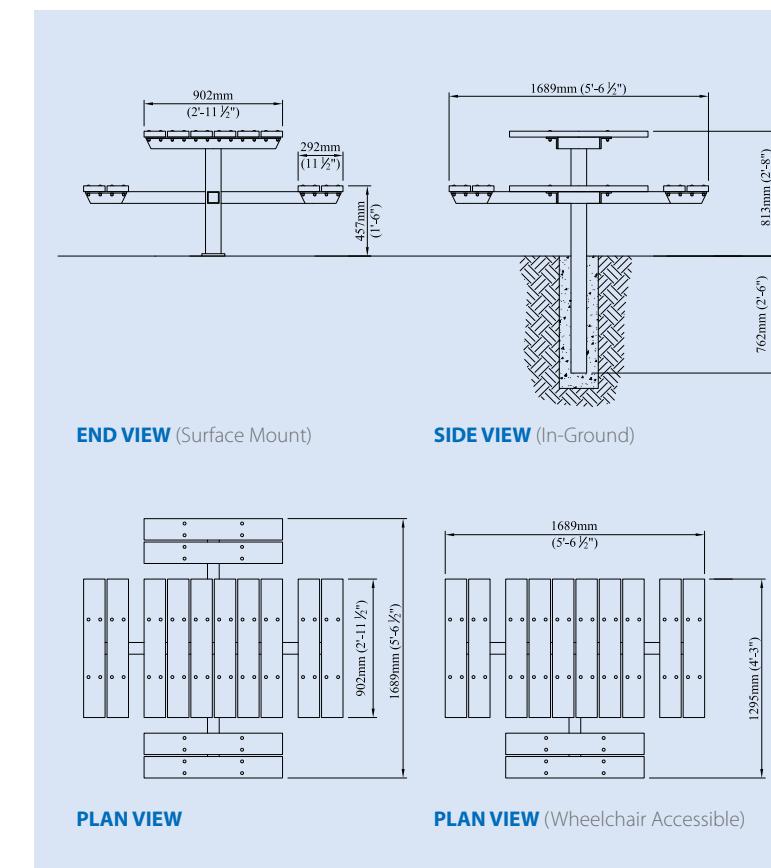

With its square design, you have the option to remove one side to create wheelchair accessibility. They may be surface or in-ground mounted.

Picnic Tables - Series C1

The Series C1 Picnic Tables bring comfortable seating to any environment.

Available in a select grade knotty cedar (finished with either Sikkens stain or Lifetime preservative) or ACQ treated pine, this is the economical version of the Series C table. If wheelchair accessibility is required, you can remove one side. The table may be surface or in-ground mounted.

Site Furnishings

Picnic Tables - Series CR

Madeira

Woodland Brown

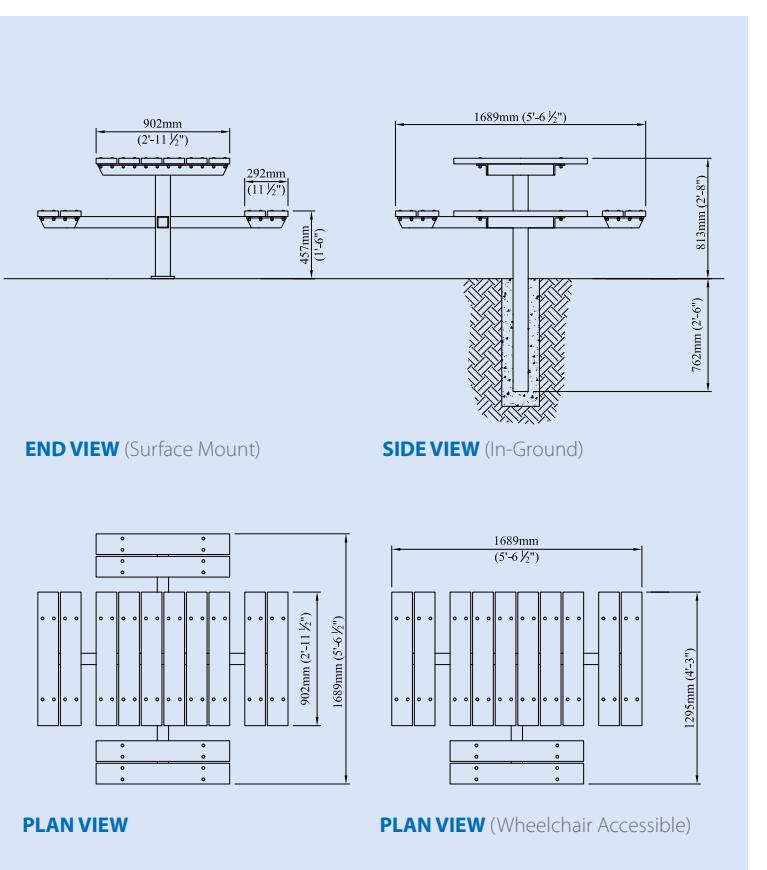

Winchester Grey

Saddle

The Series CR Picnic Table is made from long-lasting, recycled materials.

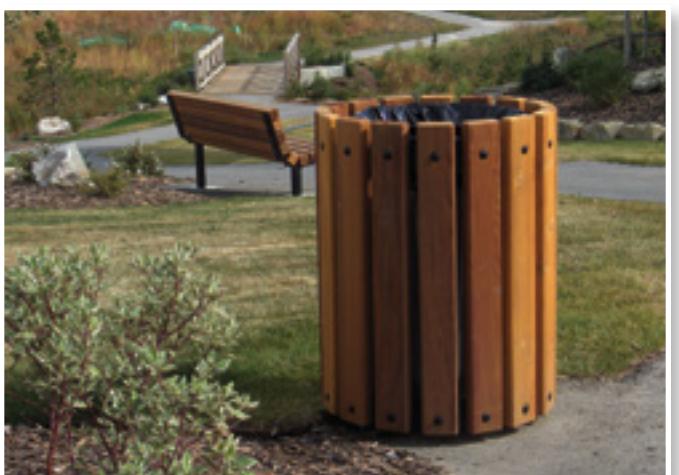

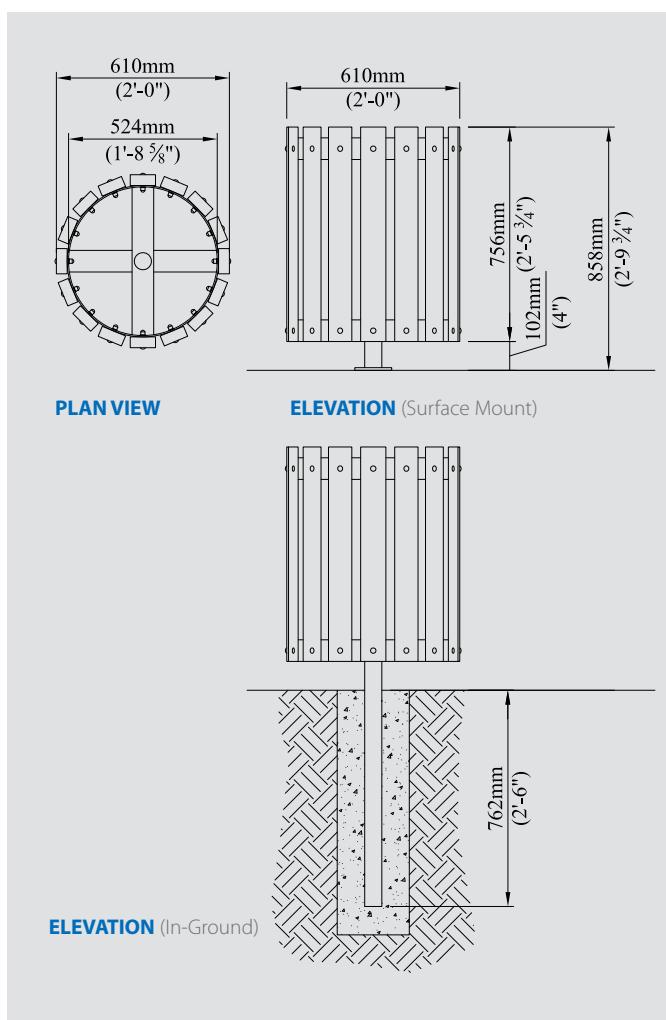

Designed to the same specifications as the Series C table, the Series CR table is available in recycled materials. The table is extremely durable, maintenance-free and is able to withstand the toughest environments. This design features the option to remove one side to create wheelchair accessibility. They may be surface or in-ground mounted.

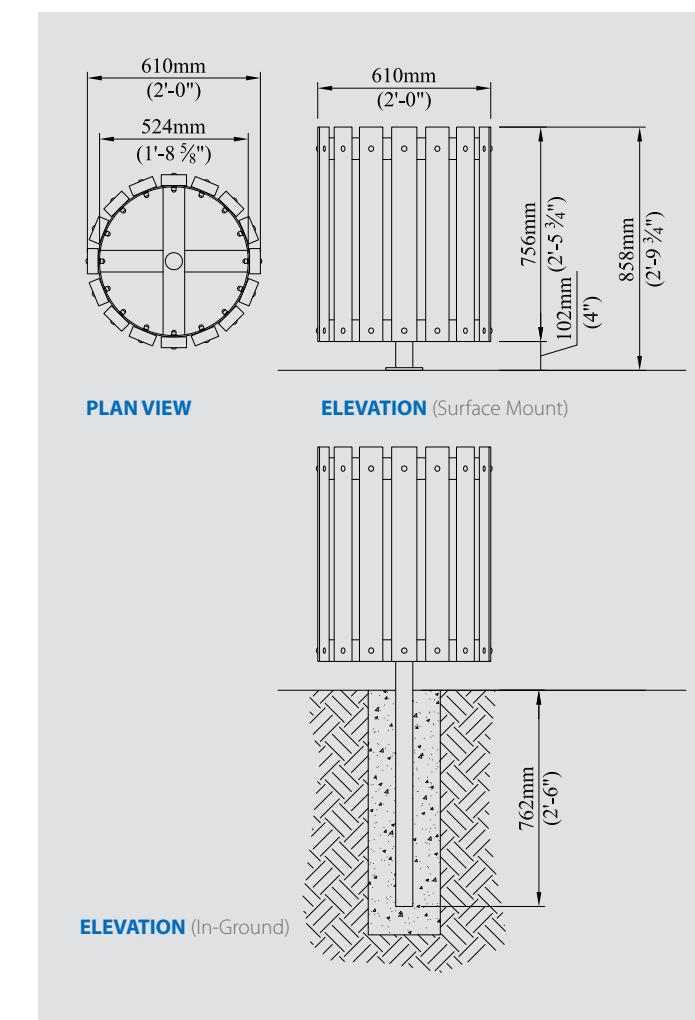

The Series A Trash Receptacle features a circular opening, with a wood plank and steel frame.

The Series A Trash Receptacle is available in a select grade knotty cedar (finished with either Sikkens stain or Lifetime preservative) or ACQ treated pine. This circular design comes with galvanized can and lid and may be surface or in-ground mounted.

The Series AR Trash Receptacle is made from recycled materials.

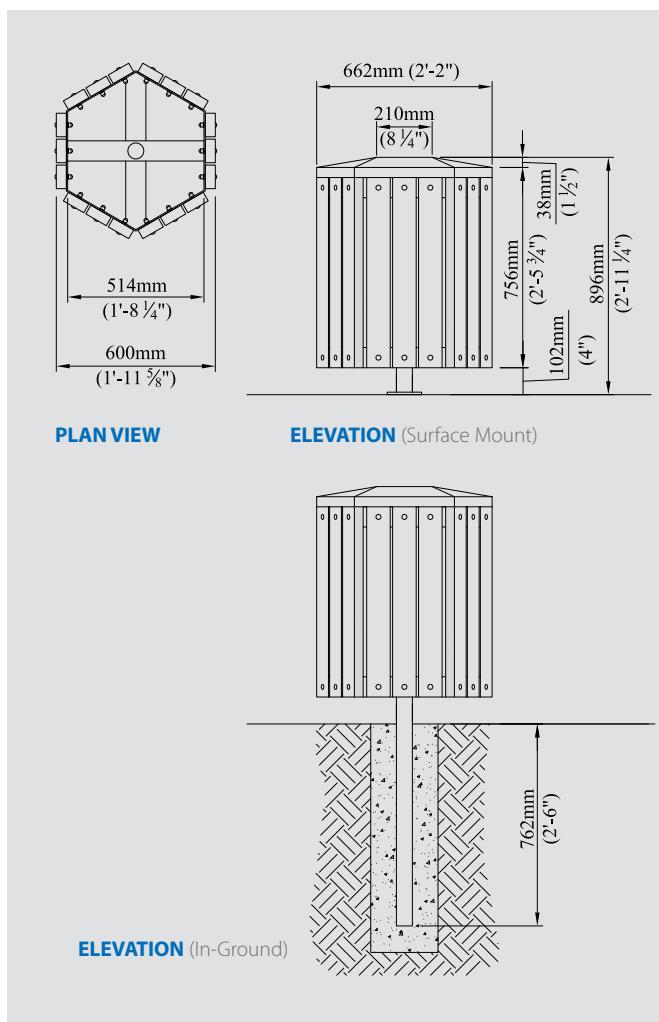

The recycled material design of the Series AR Trash Receptacle is maintenance-free, will not rot or splinter, and is protected from insect damage. This circular design comes with galvanized can with lid and may be surface or in-ground mounted. The recycled material is available in 4 colours.

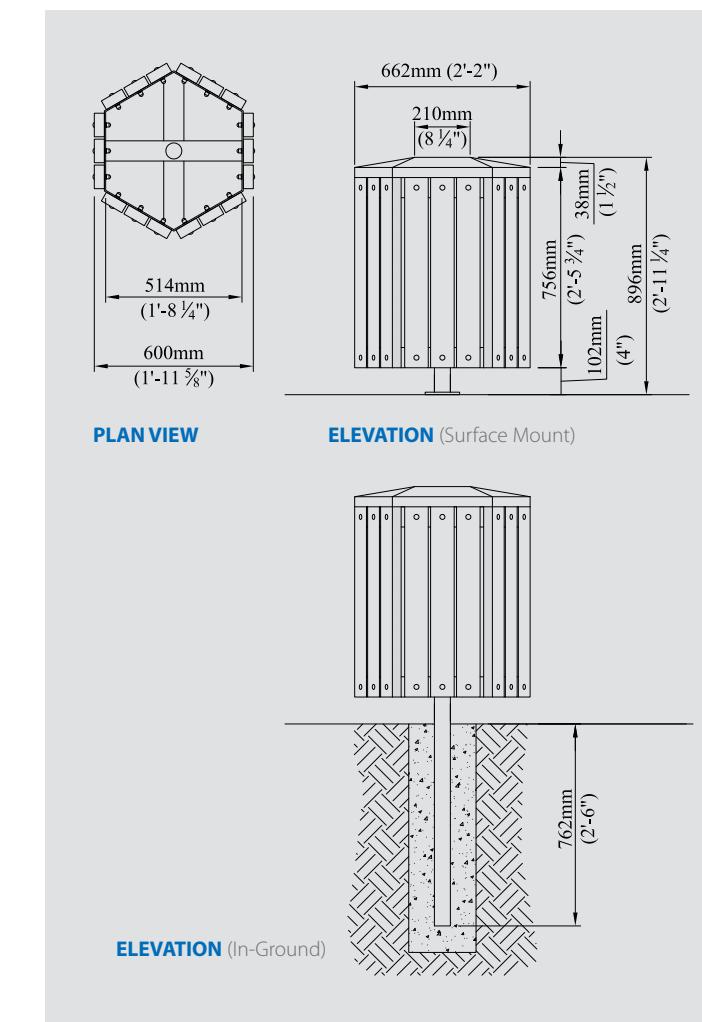

The Series B Trash Receptacles have a hexagonal design for added aesthetic.

With a hexagonal design, this trash receptacle is available in a select grade knotty cedar (finished with either Sikkens stain or Lifetime preservative) or ACQ treated pine, the Series B Trash Receptacle comes with a galvanized can liner, which is available with or without a colour-matched moulded steel lid. It may be surface or in-ground mounted.

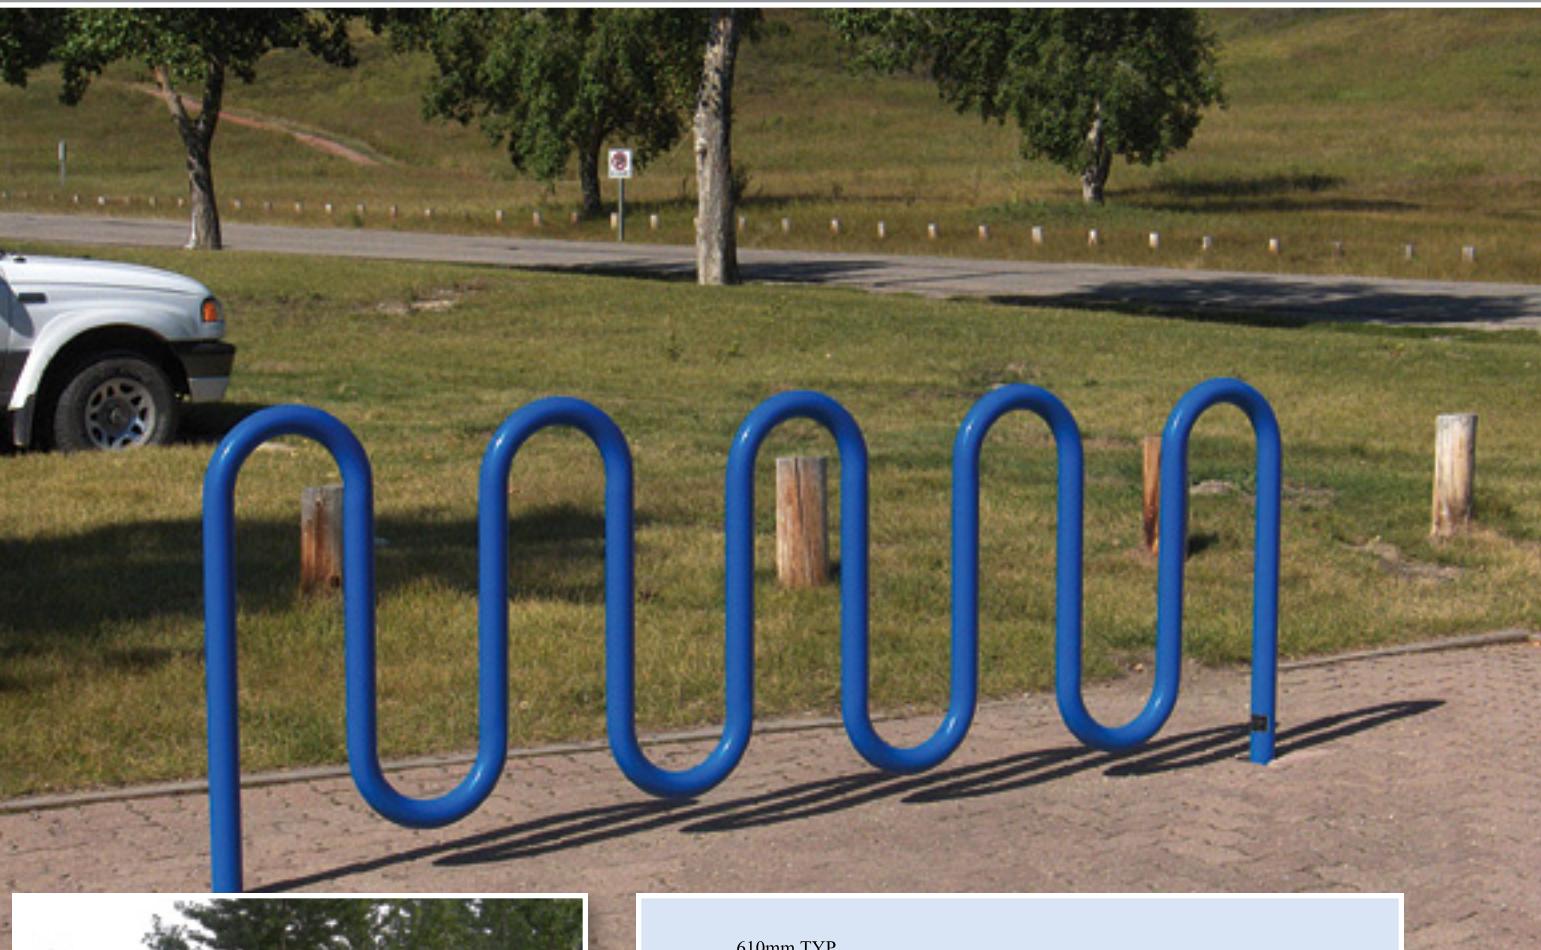

The Series BR Trash Receptacles are made from recycled materials.

The Series BR Trash Receptacle is available in recycled materials and is maintenance-free, will not rot or splinter, and is protected from insect damage. This hexagonal design comes with a galvanized can liner and is available with or without the colour-matched moulded steel lid. They may be surface or in-ground mounted. The recycled material is available in 4 colours.

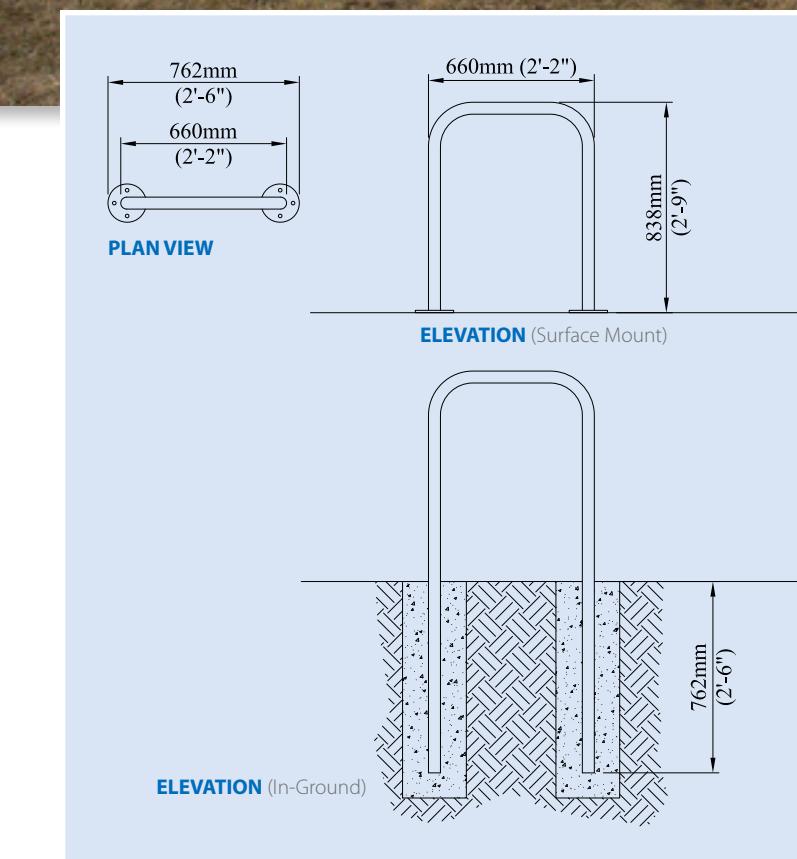

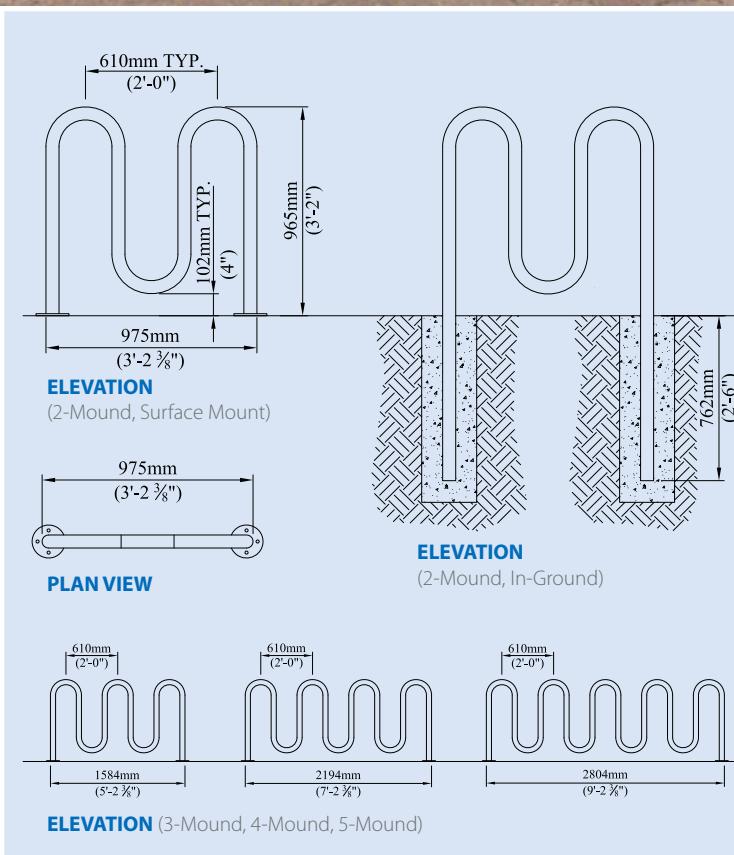

Site Furnishings

Bike Racks - Series A

The Series A Bike Rack features an attractive waved design.

The Series A Bike Rack is manufactured using high-strength steel and is ideal for any store front, school, park or public area. It is available for surface mount application or permanent in-ground installation.

The Series B Bike Rack comes in individual loops to fit any area.

Manufactured using high-strength steel, the Series B Bike Rack is perfect for any public area. With individual loops, you can easily customize this installation to fit any number of bikes. It is available for surface mount application or permanent in-ground installation.

Site Furnishings

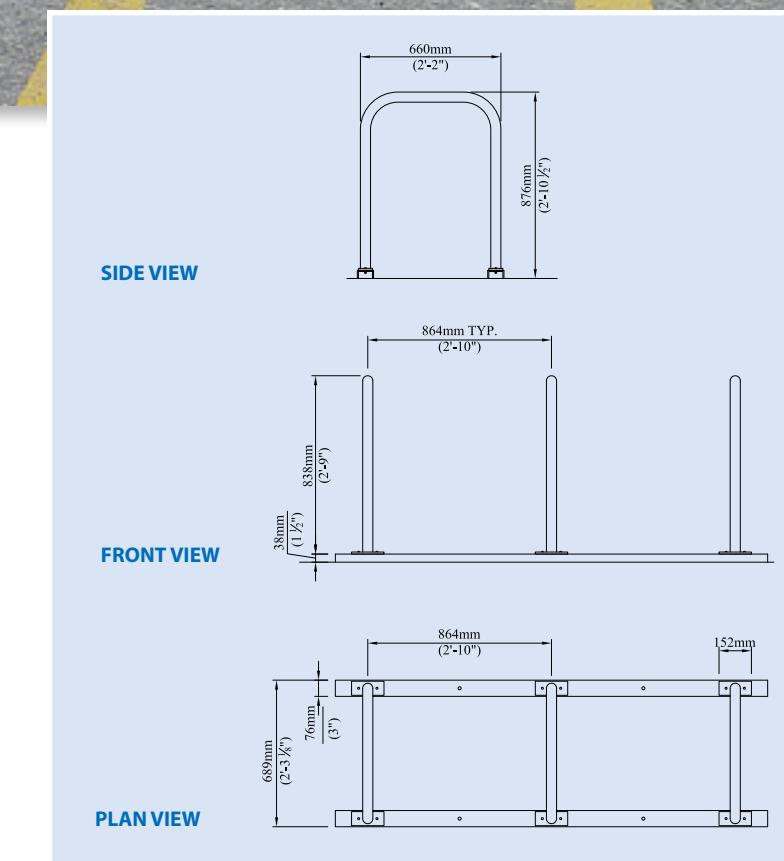

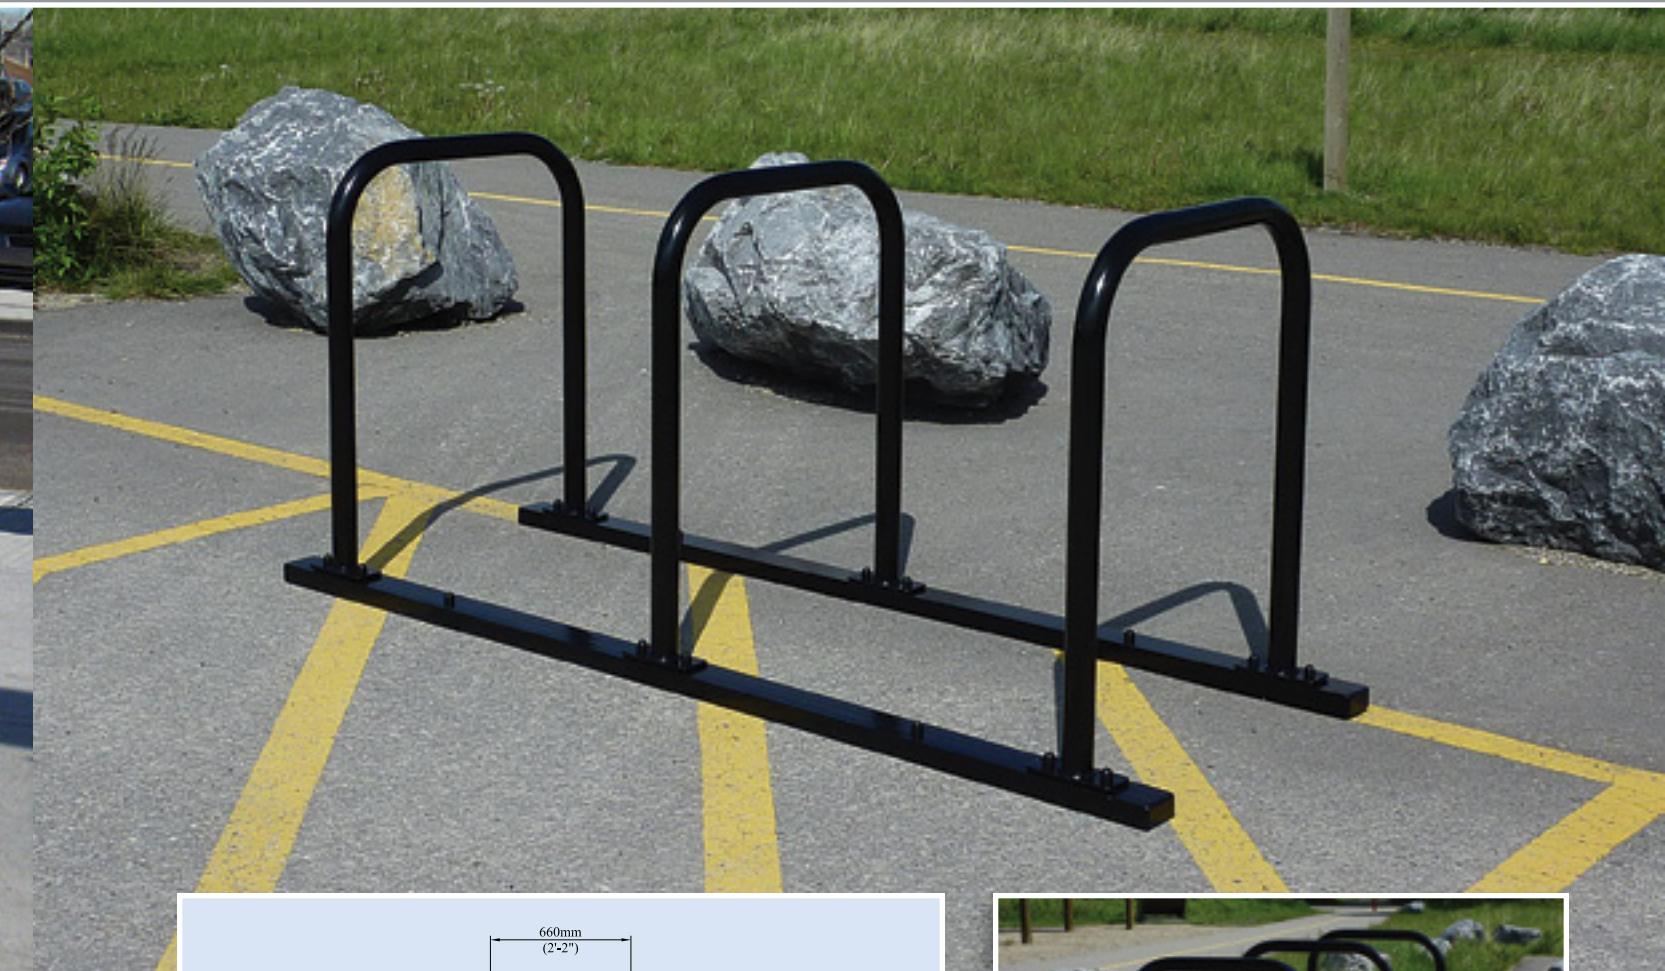

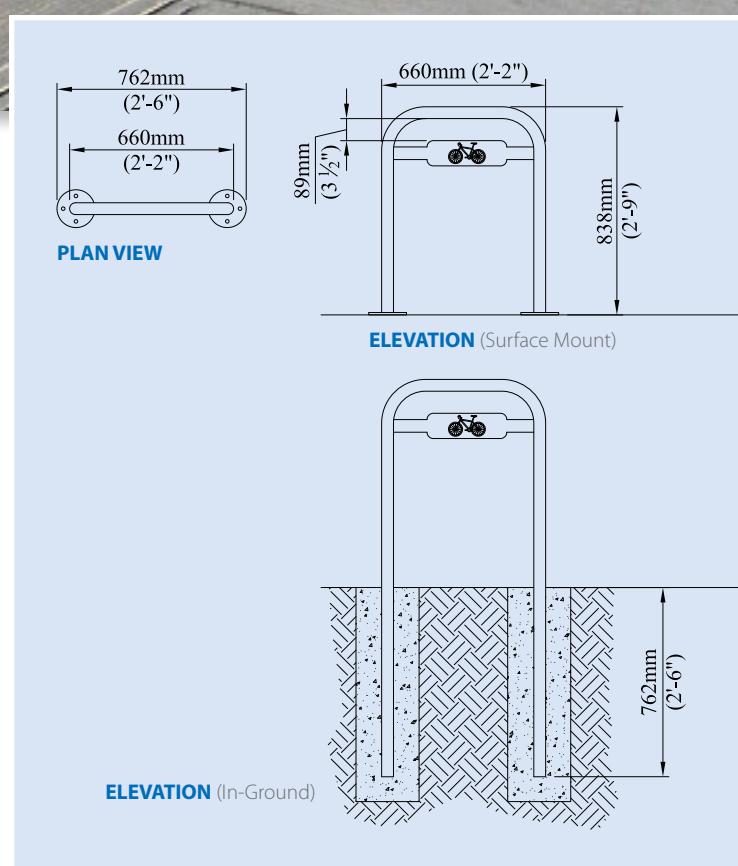

Bike Racks - Series B1

Bike Racks - Series C

The Series B1 Bike Rack includes a custom logo plate on individual loops.

The Series B1 Bike Rack is built to the same specifications as the Series B Bike Rack and is available for surface mount application or permanent in-ground installation.

The Series C Bike Rack offers flexible installation options.

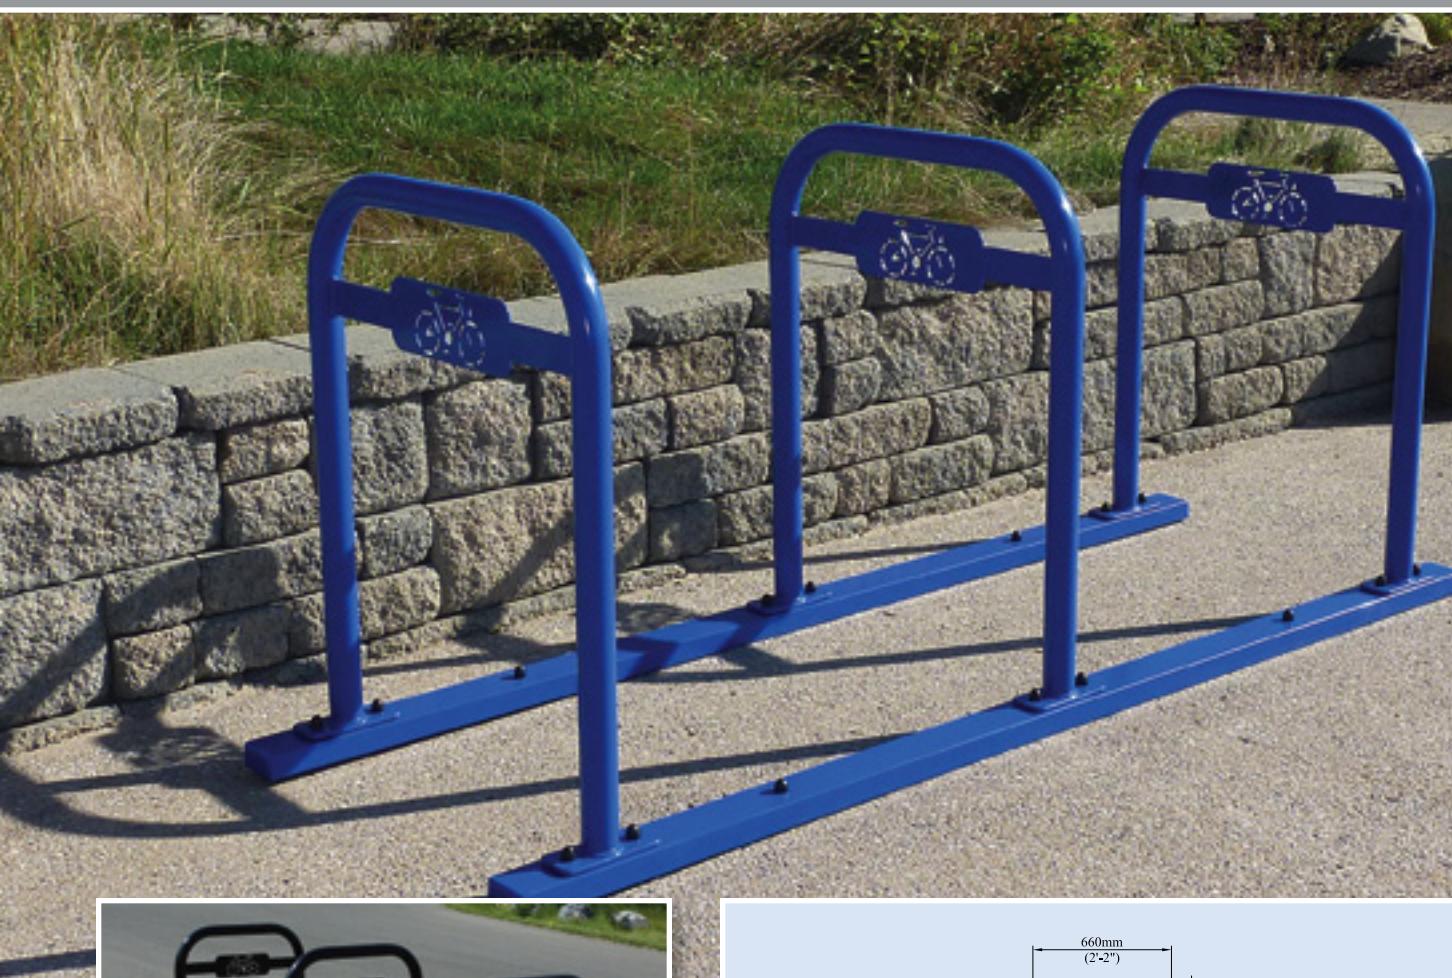

The Series C Bike Rack is manufactured using high-strength steel and is suitable for any public area. It can be left as a freestanding bike rack or bolted down for additional security and is available in units that hold up to 10 bikes.

Site Furnishings

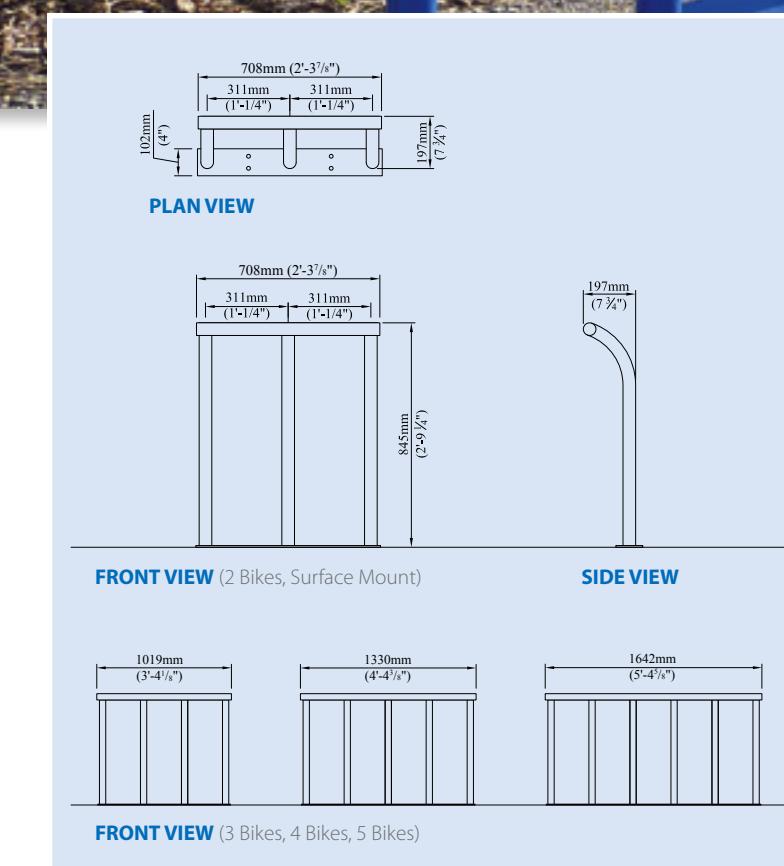

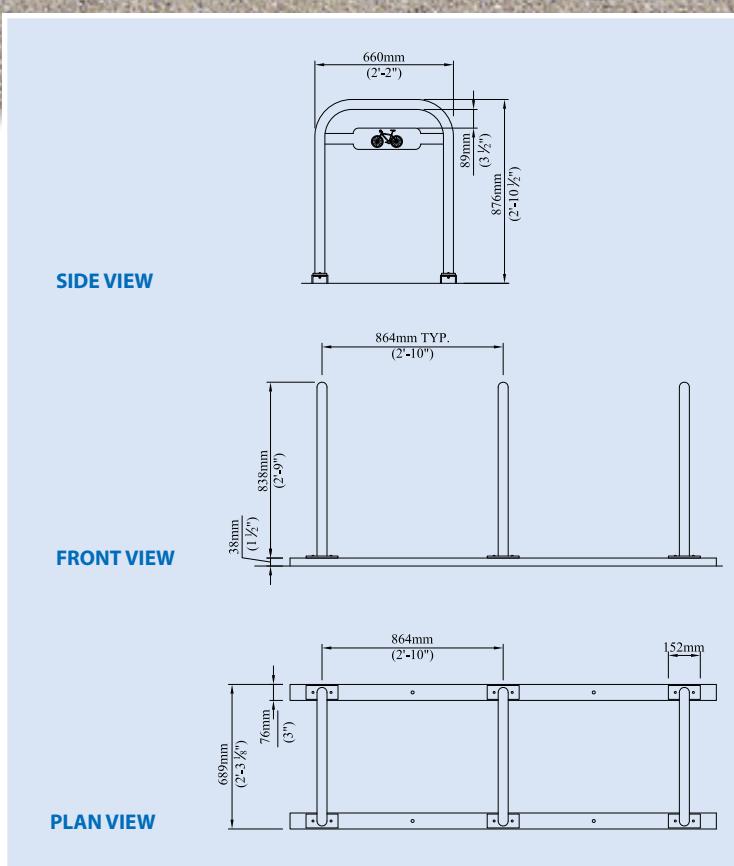

Bike Racks - Series C1

Bike Racks - Series D

The Series C1 Bike Rack includes a custom logo plate, along with flexible installation options.

Featuring the same design as the Series C Bike Rack. It can be left as a freestanding bike rack or bolted down for additional security and is available in units that hold up to 10 bikes.

The space-saving Series D Bike Rack fits well along pathways and store fronts.

This design is perfect for application along pathways due to its slim profile, and is also suitable for a variety of public areas. This is typically a bolted down bike rack, but can be modified to accommodate an in-ground application.

Site Furnishings

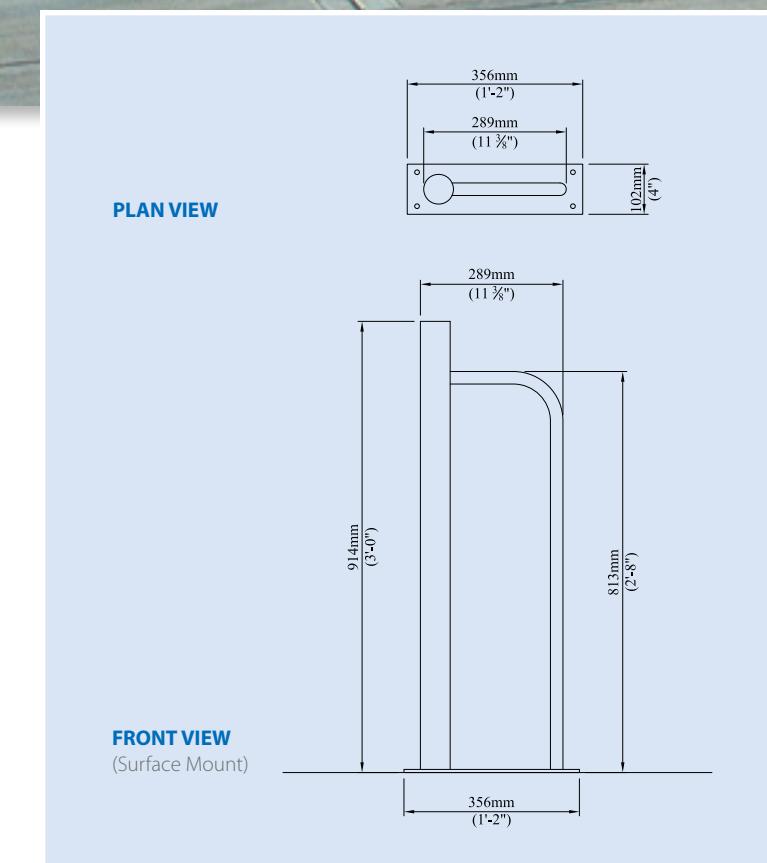

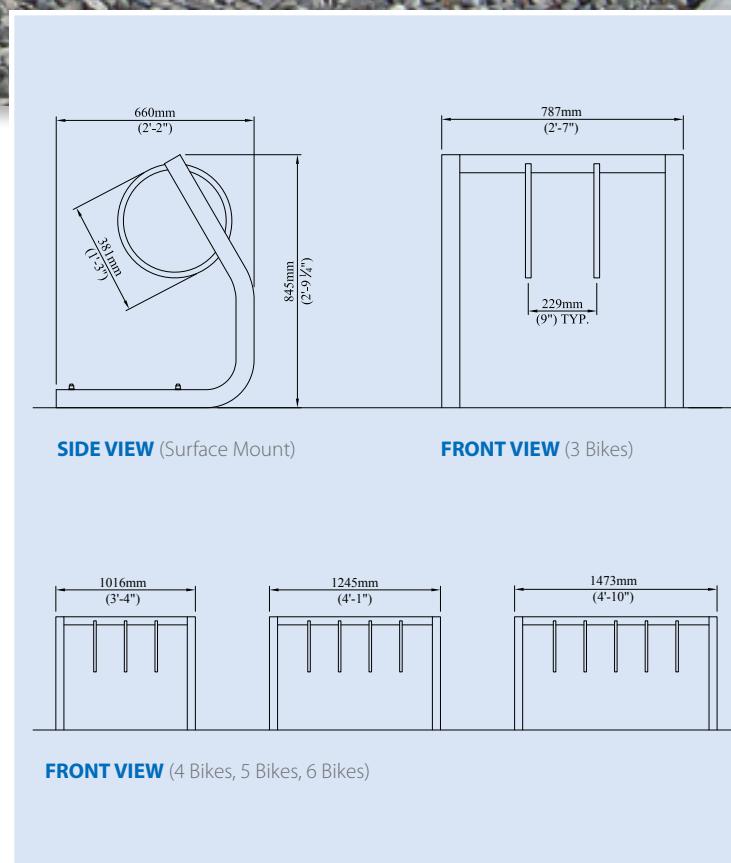

Bike Racks - Series E

Bike Racks - Series F

The Series E Bike Rack has an attractive, multi-ring design.

The Series E Bike Rack is manufactured using high-strength steel and is an ideal addition to any store front, school, park or public area. This is typically a bolted down bike rack, but can be modified to accommodate an in-ground application.

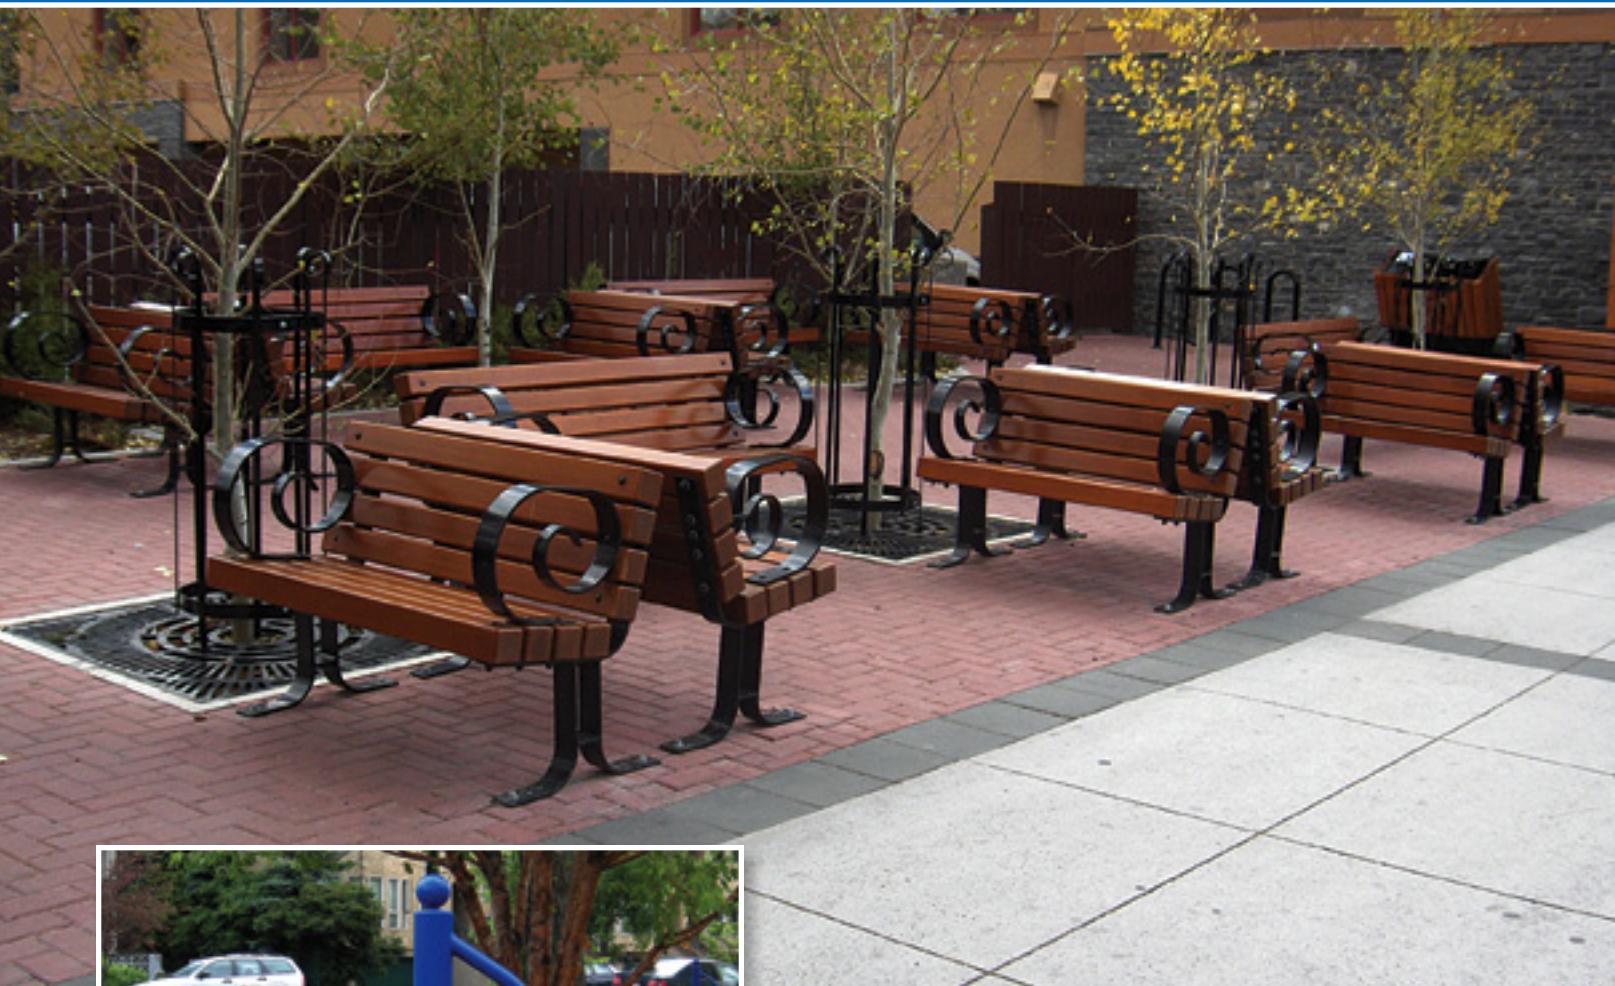

The Series F Bike Rack with a slim, single-bike post for limited spaces.

The Series F Bike Rack is manufactured using high-strength steel and works well for any area where space may be limited. This is typically a bolted down bike rack, but can be modified to accommodate an in-ground application.

Site Furnishings

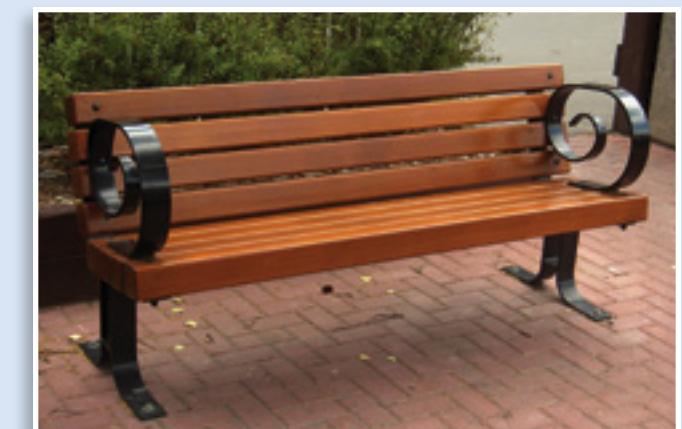

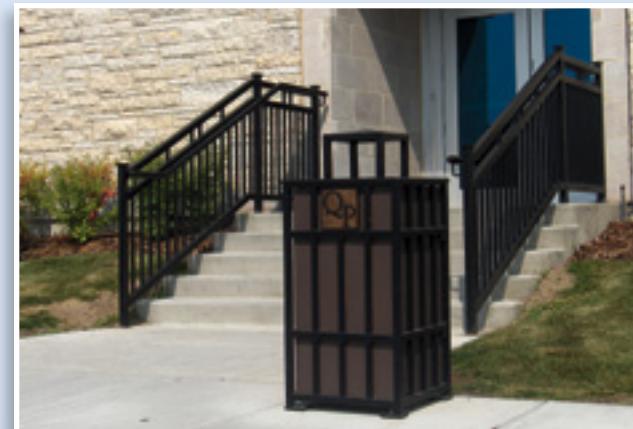

Custom Furnishings

Custom Furnishings

Custom Furnishings for any setting.

In addition to our standard line of park amenities, we welcome the opportunity to help design and construct custom furnishings to suit any application. We frequently work with designers, towns, city centres, and municipalities to create furnishings that complement the project perfectly.

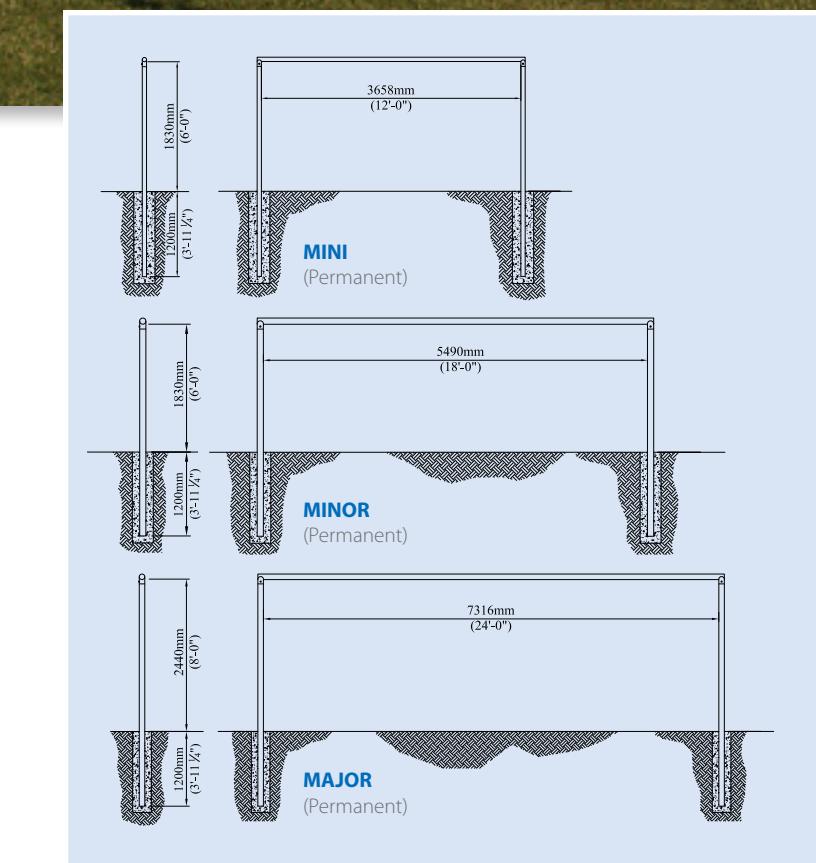

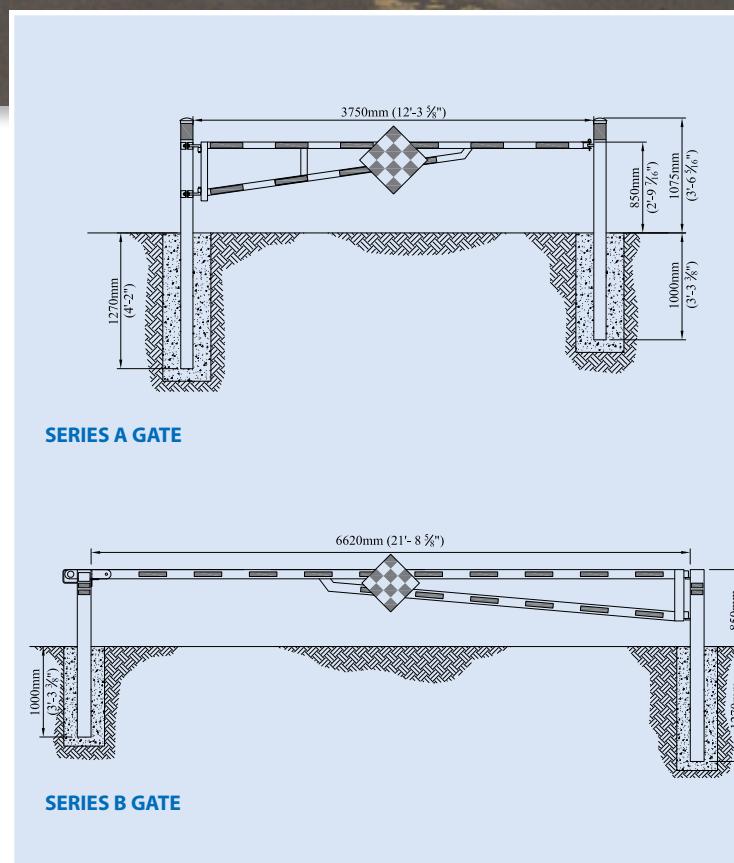

Site Accessories

Entrance Gates

**Our Entrance Gates
are designed for durability.**

Available in several different sizes, these gates can accommodate most situations where vehicle or pedestrian traffic needs to be controlled. A hitching post allows the gate to be locked in an open or closed position. All entrance gates come standard with reflective tape and an optional checkerboard design for added visibility.

Soccer Goal Posts - Permanent

**Permanent Soccer Goal Posts
are designed to withstand
vigorous athletic activity.**

Our Permanent Soccer Goal Posts are designed to withstand vigorous athletic activity. Goal post heights range from 5'5" to 8'0". Other sizes are also available upon request.

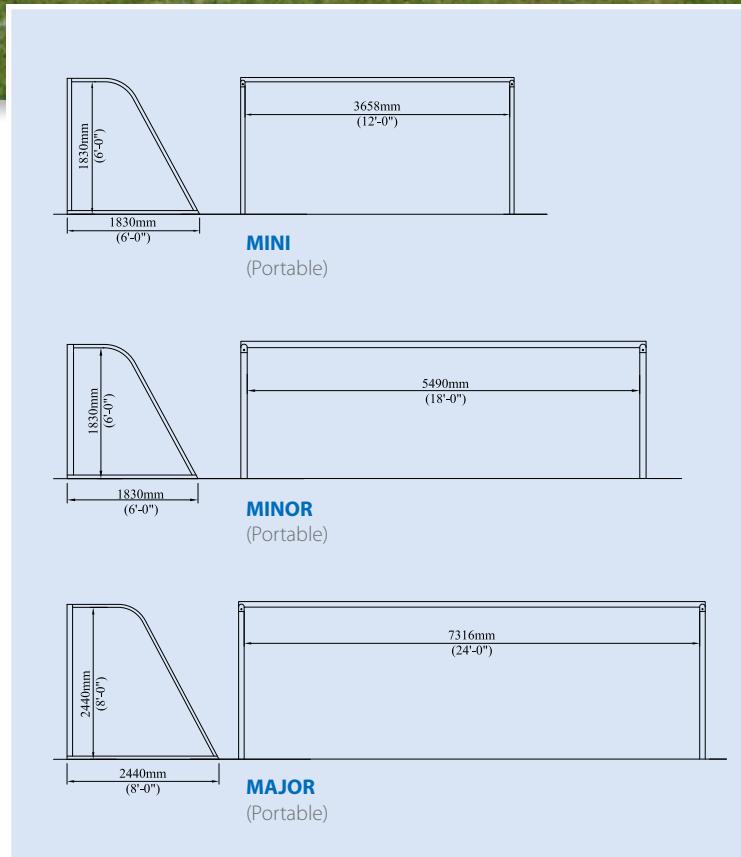

Site Accessories

Soccer Goal Posts - Portable

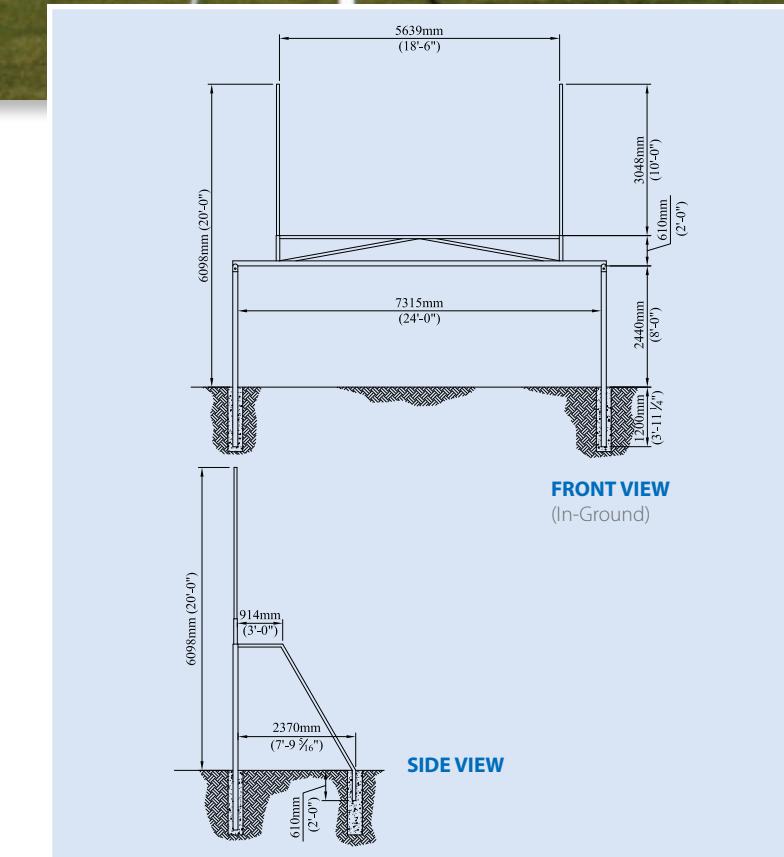

**Our Portable Soccer Goal Posts
are durable and easy to move.**

Our Portable Soccer Goal Posts are designed for durability and ease of use. With this model, you can relocate your soccer fields as needed. Wheel kits are available to make moving easy and these goal posts can be disassembled for easy storage.

Football / Soccer Goal Posts - Permanent

**Combination Football/Soccer
Goal Posts add versatility
to any field.**

Our durable Combination Football/Soccer Goal Posts are designed to withstand vigorous activity. Permanently installed, this versatile option accommodates soccer, football and rugby.

Site Accessories

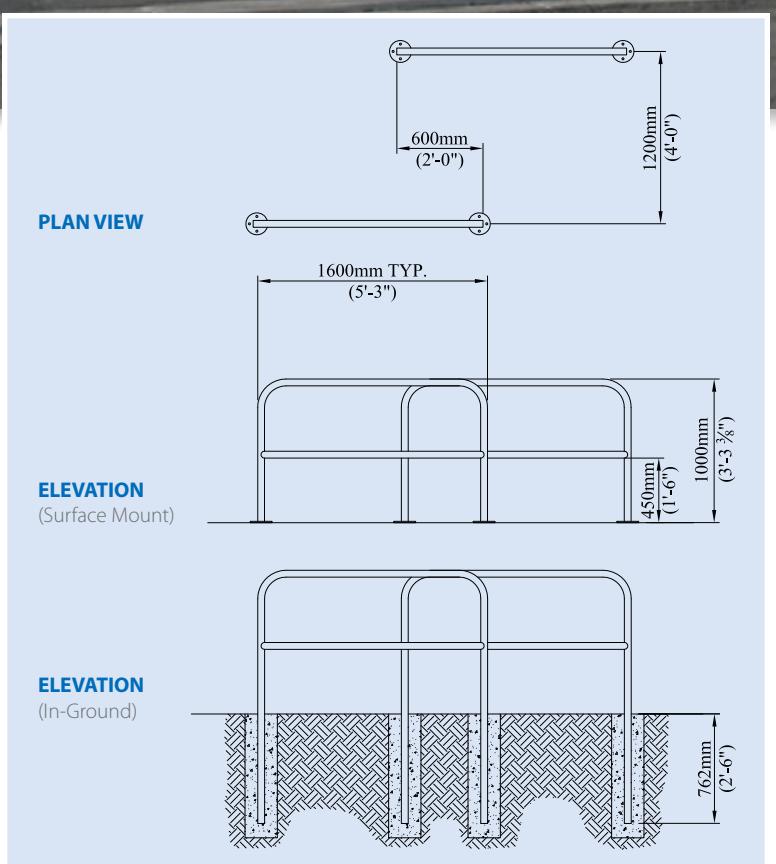

Pathway Barricades

Pathway Barricades

Pathway Barricades are suitable for a variety of applications.

Our Pathway Barricades provide an effective way of restricting vehicle access, while still allowing pedestrian traffic to flow freely throughout pathway systems. They can also be used as dividers to assist in directing pedestrian traffic. All of our pathway barricades are powder coated or galvanized for long-lasting protection.

Site Accessories

Spec Series - Breakaway Bollards

Spec Series - Permanent Bollards

Breakaway Bollards enable emergency access.

Breakaway Bollards are made of pressure-treated wood and designed to give way on impact by emergency vehicles. They are intended to deter vehicle access from pathway systems, parks and other public areas. The top portion can be easily replaced in order to maintain security. Replacement tops are available from Custom Park & Leisure.

Permanent Bollards deter unwanted vehicle access.

Our Permanent Bollards are specifically designed to facilitate traffic calming and pathway designation, and are extremely effective in providing protection against vehicle impact. All permanent bollards are powder coated in a variety of colors to ensure they are maintenance-free and are built to endure high traffic in public areas. Bollards are surface mounted or cemented in ground and are available in two standard sizes.

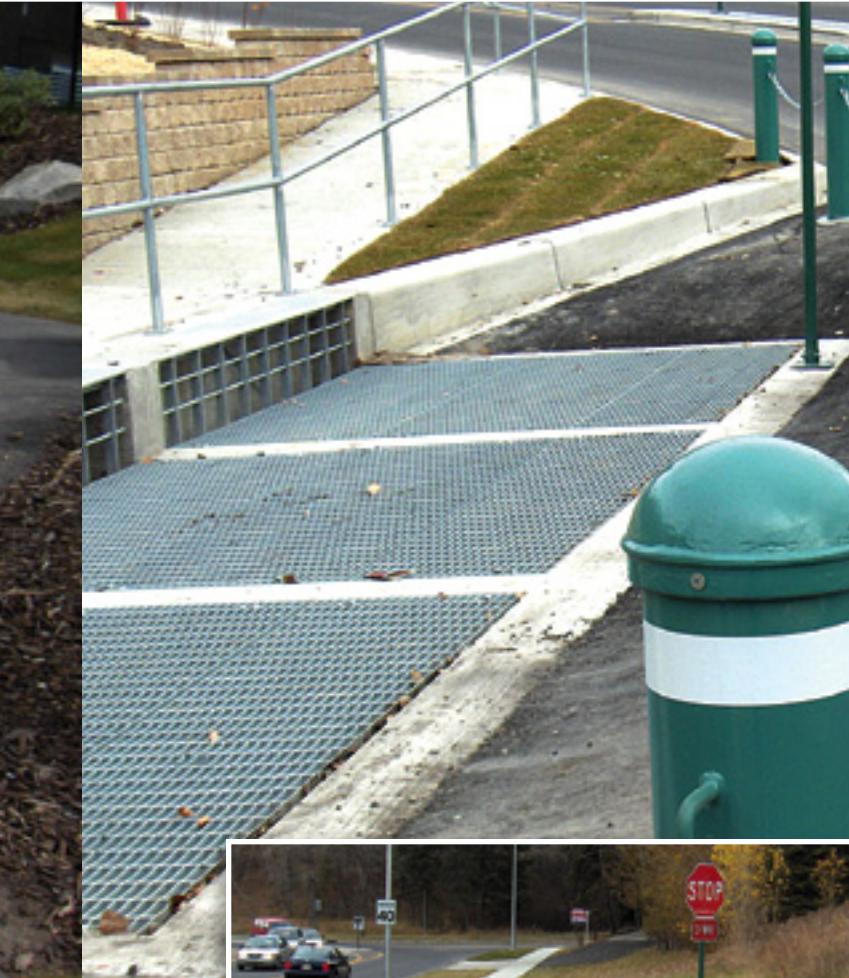

Site Accessories

Spec Series - Removable Bollards

Removable Bollards provide flexibility.

Our Removable Bollards provide the same use and efficiency as the Permanent Bollard and are available in two standard sizes. The Removable Bollard can be manually lifted off the base when unlocked with a key, while the base remains permanently cemented in ground. This provides vehicle or equipment access.

Spec Series - Concrete Filled Bollards

Concrete-Filled Bollards provide the ultimate protection.

For the ultimate barrier, the Concrete-Filled Bollard uses the additional mass of concrete fill to further prevent the risk of property damage. They provide effective protection against vehicle impact and are typically used in high security or high traffic areas such as storefronts and rear shop doors.

Site Accessories

Decorative Bollards - Series A

Series A Decorative Bollards provide protection with an enhanced design.

Our Series A Decorative Bollards provide an aesthetically pleasing means of creating a safety barrier for pedestrian traffic, as well as storefront security. We manufacture a variety of designs with a chain linking option also available. These bollards are powder coated to ensure they are maintenance-free and are available in a variety of colors.

Series B Decorative Bollards combine architectural design with strong protection.

The combination of architectural design and the strength of heavy, walled steel material in our Series B Decorative Bollards makes for an attractive and durable addition to any development.

Decorative Bollards - Series B

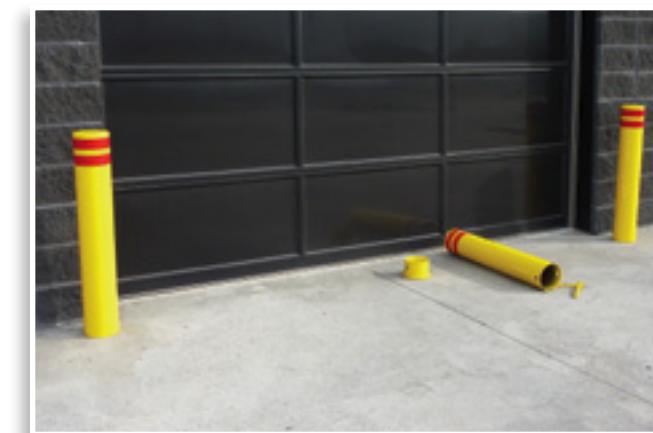

Site Accessories

Decorative Bollards - Series C

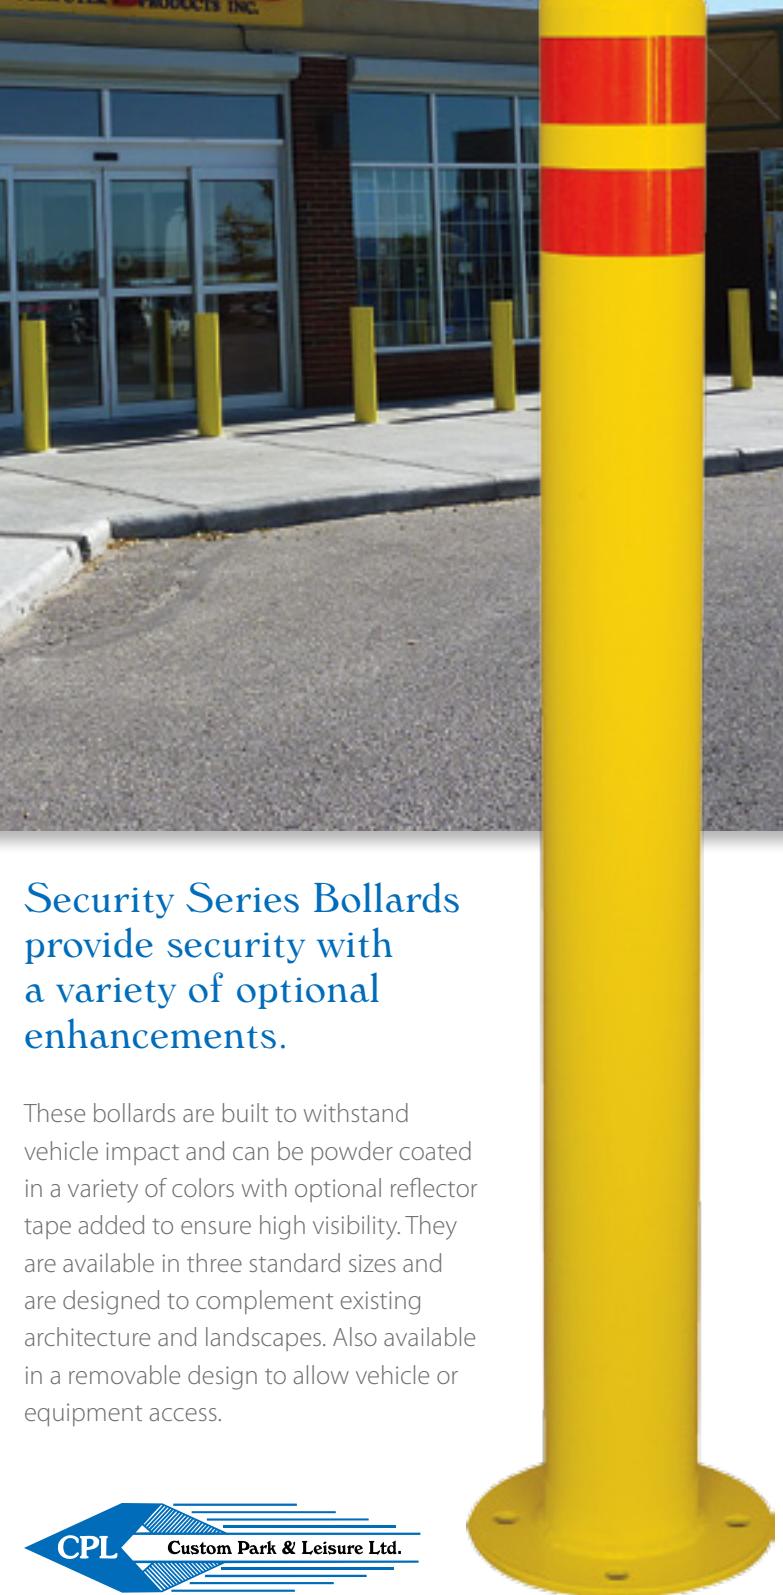

The Series C Decorative Bollard is maintenance-free.

The Series C Decorative Bollard provides an aesthetically pleasing means of creating a safety barrier for pedestrian traffic, as well as storefront security.

Security Bollards - Series A

Security Series Bollards provide security with a variety of optional enhancements.

These bollards are built to withstand vehicle impact and can be powder coated in a variety of colors with optional reflector tape added to ensure high visibility. They are available in three standard sizes and are designed to complement existing architecture and landscapes. Also available in a removable design to allow vehicle or equipment access.

Railings

Decorative Railings

Decorative Railings

We have experience manufacturing a variety of architecturally designed railings and our expertise ensures a quality, trouble-free installation.

At CPL, we are known for our attention to detail and it shows in our line of decorative railings. Meticulously fabricated, our railings are an aesthetically pleasing addition to any community or development. With the option of a powder coated or galvanized finish, you are assured long-lasting performance and durability.

Railings

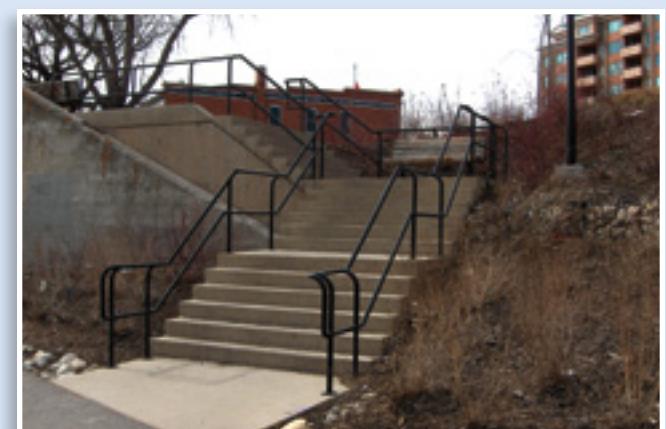

Safety Railings

Safety Railings

We have extensive experience working with engineers and architects to manufacture high quality safety railings.

We take pride in maintaining current safety qualifications and operate a CWB certified facility. Our reputation for quality fabrication, installation and superior service is renowned throughout Alberta. We have provided safety railings for many high-profile locations throughout Calgary and the surrounding area.

Appendix

CEDAR - LIFETIME FINISH

This is an organic-based preservative that allows cedar to weather to a natural silver colour. This product is a one-time application with no future application required.

CEDAR - SIKKENS FINISH

This is a top-quality oil-based stain which enhances the natural beauty of the cedar, giving it long-term protection from the elements.

PINE - ACQ TREATMENT

This is an approved preservative treatment that is environmentally friendly and allows the wood to fade to a light green colour as it ages. This is a one-time application and does not require any additional treatment.

TREX

Trex is made of recycled materials, including plastic and wood. This superior alternative to wood does not rot or splinter, and is shielded from insect damage. This beautiful product is maintenance-free and contains no toxic chemicals or preservatives. [Trex colour samples are available upon request.](#)
